# Greenwich LifeSciences Provides Update on CEO Interviews & Corporate Events

STAFFORD, Texas, Aug. 11, 2025 (GLOBE NEWSWIRE) -- Greenwich LifeSciences, Inc. (Nasdaq: GLSI) (the "Company"), a clinical-stage biopharmaceutical company focused on the development of GLSI-100, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery, today provided the following update on CEO interviews and corporate events.

The following videos, which include CEO interviews, are now available on the Company's website at the bottom of the Welcome page: <https://greenwichlifesciences.com/>

- Jun 28, 2025 – *Interview on Bloomberg TV (recorded April 2025)*
- Jun 4, 2025 – *Live Fireside Chat with Research Analyst at Noble Virtual Conference*
- Apr 29, 2025 – *Live Interview on Charles Schwab Network with Diane King Hall*
- *Introductory Video*

The Company's recent prior events are listed below:

- Nov 19 - 21, 2024 – *Jefferies London Healthcare Conference*
- Dec 10 - 13, 2024 – *San Antonio Breast Cancer Symposium (SABCS) with Flamingo-01 Poster, Booth, & Conference Room*
- Dec 19, 2024 – *Annual Meeting of Stockholders*
- Feb 10 - 11, 2025 – *BIO CEO & Investor Conference*
- Mar 6 - 7, 2025 – *German Breast Group Annual Scientific Meeting*
- May 14 - 16, 2025 – *ESMO Breast Conference in Germany with Flamingo-01 Poster & Booth*
- May 20, 2025 – *H.C. Wainwright 3rd Annual BioConnect Investor Conference at Nasdaq*
- Jun 2, 2025 – *American Society of Clinical Oncology (ASCO) with Flamingo-01 Poster*
- Jun 4, 2025 – *Noble Emerging Growth Virtual Conference*
- Jun 5, 2025 – *Jefferies Global Healthcare Conference*
- Jun 16 - 19, 2025 – *BIO International Convention (partnering conference)*

## About FLAMINGO-01 and GLSI-100

FLAMINGO-01 (NCT05232916) is a Phase III clinical trial designed to evaluate the safety and efficacy of GLSI-100 (GP2 + GM-CSF) in HER2 positive breast cancer patients who had residual disease or high-risk pathologic complete response at surgery and who have completed both neoadjuvant and postoperative adjuvant trastuzumab based treatment. The trial is led by Baylor College of Medicine and currently includes US and European clinical sites from university-based hospitals and academic and cooperative networks with plans to

open up to 150 sites globally. In the double-blinded arms of the Phase III trial, approximately 500 HLA-A\*02 patients will be randomized to GLSI-100 or placebo, and up to 250 patients of other HLA types will be treated with GLSI-100 in a third arm. The trial has been designed to detect a hazard ratio of 0.3 in invasive breast cancer-free survival, where 28 events will be required. An interim analysis for superiority and futility will be conducted when at least half of those events, 14, have occurred. This sample size provides 80% power if the annual rate of events in placebo-treated subjects is 2.4% or greater.

For more information on FLAMINGO-01, please visit the Company's website [here](#) and [clinicaltrials.gov](https://clinicaltrials.gov) [here](#). Contact information and an interactive map of the majority of participating clinical sites can be viewed under the "Contacts and Locations" section. Please note that the interactive map is not viewable on mobile screens. Related questions and participation interest can be emailed to: [flamingo-01@greenwichlifesciences.com](mailto:flamingo-01@greenwichlifesciences.com)

### **About Breast Cancer and HER2/neu Positivity**

One in eight U.S. women will develop invasive breast cancer over her lifetime, with approximately 300,000 new breast cancer patients and 4 million breast cancer survivors. HER2 (human epidermal growth factor receptor 2) protein is a cell surface receptor protein that is expressed in a variety of common cancers, including in 75% of breast cancers at low (1+), intermediate (2+), and high (3+ or over-expressor) levels.

### **About Greenwich LifeSciences, Inc.**

Greenwich LifeSciences is a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery. GP2 is a 9 amino acid transmembrane peptide of the HER2 protein, a cell surface receptor protein that is expressed in a variety of common cancers, including expression in 75% of breast cancers at low (1+), intermediate (2+), and high (3+ or over-expressor) levels. Greenwich LifeSciences has commenced a Phase III clinical trial, FLAMINGO-01.
