## Alico Reports First Quarter Earnings

LA BELLE, Fla., Feb. 9, 2010 (GLOBE NEWSWIRE) -- Alico, Inc. (Nasdaq:ALCO), a land management company, announced a net loss for the three months ended December 31, 2009 of \$1.4 million or \$0.19 per share compared with a loss of \$0.2 million or \$0.02 per share, for the three months ended December 31, 2008. Earnings from interest on mortgages, real estate sales and agriculture operations were below prior year results and combined to cause the earnings decline.

Operating revenues were \$14.1 million and \$20.3 million during the three months ended December 31, 2009 and 2008, respectively. Operations produced a gross loss of \$1.1 million during the three months ended December 31, 2009, compared with a loss of \$0.7 million during the three months ended December 31, 2008. The decreases in revenue and gross profits were primarily due to lower revenues and profits from agriculture operations.

Steven M. Smith, President and Principal Executive Officer, noted, "The Florida citrus harvest began later for the 2009-10 season than in 2008-09 which has resulted in reduced revenue and gross profit from agricultural operations during the first quarter. We expect this timing difference to reverse during the quarter ending March 31, 2010. Additionally, interest revenue and real estate revenue were reduced during the first quarter of fiscal year 2010 when compared with the first quarter of fiscal year 2009 due to a purchaser default on a mortgage in April of 2009. We continue our cost reduction strategy and are seeing promising results. We do not expect a drastic improvement in profitability until the real estate market begins to recover."

### **About Alico, Inc.**

Alico, Inc., a land management company operating in Central and Southwest Florida, owns approximately 135,500 acres of land located in Collier, Glades, Hendry, Lee and Polk counties.
