Ingram Micro Expands ITAD Presence in South America

IRVINE, Calif.--(BUSINESS WIRE)-- Ingram Micro Commerce & Lifecycle Services today announced the opening of a new IT Asset Disposition (ITAD) Processing Center in Bogotá, Colombia. This is the company's second facility in South America. The new, full-service location is designed to provide a full range of ITAD services including onsite data sanitization or degaussing, as well as end-of-life asset collections, processing, remarketing and recycling.

"The Bogotá ITAD facility extends our commitment to provide directly-managed services on a global basis as we continue the strategic expansion of our ITAD presence into underserved markets," said Todd Zegers, vice president, ITAD, Commerce & Lifecycle Services. "With this latest comprehensive service facility, we now have 15 international locations. Combined with our 16 facilities in the United States, Ingram Micro offers ITAD services through 31 facilities across the globe to better serve the evolving needs of our multinational client base. And, we're not stopping here: we will be announcing additional facilities throughout the year to provide efficient, timely and cost-effective services to a broad range of companies."

"As we evaluated the market for ITAD services in South America, Colombia represented a solid building block for Ingram Micro," adds Martin Garcia-Brosa, executive director Latin America, Commerce & Lifecycle Services. "Our new Bogotá facility not only supports our full ITAD offering including data sanitization, refurbishing, remarketing, and recycling, it also allows us to offer onsite data destruction throughout the country."

The Bogotá Ingram Micro ITAD facility is open and in full operation.
