Tecogen Sells Combined Heat and Power (CHP) System to Columbia Association

WALTHAM, Mass., June 30, 2015 /PRNewswire/ -- Tecogen[®] Inc. (NASDAQ: TGEN) today announced the sale of a CM-60 combined heat and power (CHP) module to the Columbia Association (CA) in Columbia, Maryland. The 60 kilowatt unit will be installed at the Supreme Sports Club, the largest of three full service fitness facilities operated by CA. In addition to providing electrical power to the facility, the CHP system will provide domestic hot water and pool heating at a far lower overall operating cost than the existing configuration.

"CA is continuously looking for opportunities to improve the energy efficiency of its operations and reduce energy consumption and greenhouse gas emissions," said Jeremy Scharfenberg, Energy Manager for Columbia Association. "Our Strategic Plan calls for environmental stewardship by incorporating innovative technology and conservation practices. In addition to the cost savings we will see with the CHP system, we value the environmental benefits that the Tecogen system will provide."

"We are delighted to be part of the CA community," said Robert Panora, President and COO of Tecogen. "CA has shown itself to be a leader in energy management and institutional sustainability. Tecogen systems are a perfect fit for organizations with significant electricity and thermal demands such as CA. We look forward to working with them."

Tecogen is providing the CHP system in an outdoor enclosure to be located adjacent to the fitness facility. Locating the unit outside is a cost-effective way to reduce cost of retrofitting mechanical areas for CHP. Tecogen will also provide skid-mounted plumbing assemblies that interface with domestic hot water and pool systems to allow cost-effective integration.

About Tecogen

Tecogen manufactures, installs, and maintains high efficiency, ultra-clean combined heat and power products including natural gas engine-driven cogeneration, air conditioning systems, and high-efficiency water heaters for residential, commercial, recreational and industrial use. The company is known for cost efficient, environmentally friendly and reliable products for energy production that, through patented technology, nearly eliminate criteria pollutants and significantly reduce a building's carbon footprint.

In business for over 20 years, Tecogen has shipped more than 2,000 units, supported by an established network of engineering, sales, and service personnel across the United States. For more information, please visit www.tecogen.com.

About Columbia Association

Columbia Association (CA) is a nonprofit service corporation that manages Columbia, MD, a planned community that is home to approximately 100,000 people and several thousand

businesses. Additional information about CA is available at www.ColumbiaAssociation.org.
