# Florida Company Orders Three Tecochill RT-50 Chillers for New HQ

## Changing energy market fundamentals make Florida an increasingly attractive market for Tecogen's products

WALTHAM, MA -- (Marketwired) -- 04/04/18 -- [Tecogen Inc.](#) (NASDAQ: TGEN) a leading manufacturer of clean energy cogeneration products that, through patented technology, nearly eliminate criteria pollutants and significantly reduce a customer's carbon footprint, is pleased to announce that a major corporation in Florida's Tampa Bay area has decided to purchase three Tecochill RT-50 series chillers that will be installed at its new headquarters, currently under construction. The units are expected to ship by the end of the second quarter.

Stephen Lafaille, Tecogen's Product Manager, stated, "The air-cooled RT-50 occupies a market segment that has good potential for growth, for example relatively small commercial and industrial facilities that do not require the cooling capacity of our larger STx and DTx chillers. Being air-cooled, the RT does not require the added complexity of a cooling tower, which reduces both installation and operational costs. This in turn can also make it a cost-effective option for distributing cooling capacity across a campus."

Tecogen CEO Benjamin Locke commented, "Growing concerns about rising electric rates and grid resiliency are making Florida an increasingly attractive market for our products. Importantly, the state's Governor Rick Scott just last month signed into law two bills (SB 7028 and HB 7099) that require all nursing homes and assisted living facilities in the state to have an emergency back-up power source that can keep the air conditioning running in case of a power outage. Both our Tecochill line of natural gas-powered chillers and our flagship InVerde e+ cogeneration product can be an integral part of the solution to meet the new requirement as the law allows for machines powered by pipeline gas. I would note that our chillers require less than 1% of the electricity to operate as a competing electrical chiller, which a small retail back-up generator can easily provide."

### **About Tecogen**

[Tecogen Inc.](#) designs, manufactures, sells, installs, and maintains high efficiency, ultra-clean, cogeneration products including natural gas engine-driven combined heat and power, air conditioning systems, and high-efficiency water heaters for residential, commercial, recreational and industrial use. The company is known for cost efficient, environmentally friendly and reliable products for energy production that, through patented technology, nearly eliminate criteria pollutants and significantly reduce a customer's carbon footprint.

In business for over 30 years, Tecogen has shipped more than 2,500 units, supported by an established network of engineering, sales, and service personnel across the United States.
