## Inpixon Receives FCC Certification For Ultra-WideBand (UWB) Module

**Designed to Enable Sensors to Position Tags and UWB-Emitting Devices to within 30 Centimeters Accuracy for Asset Tracking, Indoor Positioning, Wayfinding, Social Distancing, Contact Tracing**

PALO ALTO, Calif. and TORONTO, Aug. 10, 2020 /PRNewswire/ -- Inpixon (Nasdaq: INPX), a leading indoor data company that delivers Indoor Intelligence™ solutions, today announced it has received certification for its Ultra-WideBand (UWB) module from the U.S. Federal Communications Commission (FCC).

The FCC-certified UWB module is designed and developed by Inpixon for use in Inpixon and third-party sensors, built to meet the IEEE 802.15.4 UWB standard and has an ability to provide positional accuracy of under 30 centimeters. According to [Market and Markets](#), the Ultra-Wideband market is projected to reach USD \$2.7 billion by 2025 at a CAGR of 19.6%. The anticipated growth is due to the rapid adoption of UWB technology within consumer electronics and Industrial Internet of Things (IIOT) applications including numerous use cases across the healthcare, manufacturing, hospitality, security and other industries. Companies such as Apple, NXP and Samsung are utilizing UWB for device-to-device applications and location-based services due to its high accuracy and reliability with low-to-no radio signal interference.

"Inpixon is determined to establish ourselves as the leader in the indoor location technology market, leveraging both our comprehensive offering and first-in-class technologies which enable our customers to achieve the right mix of solutions for their specific needs," said Nadir Ali, Inpixon CEO. "This new FCC-certified UWB module will enable many of our existing and new enterprise customers to gain significant advantage by utilizing a unique combination of cellular, Wi-Fi, Bluetooth and Ultra-Wideband (UWB) signal detection for positioning. We believe Inpixon's sensors, analytics, and mapping, combined within our intelligent, integrated platform, provide customers the best digital situational awareness technology for location services, security, risk mitigation and public safety for their indoor spaces."

"We are especially proud of our research and development team for these technological achievements, as well as rapid prototyping, testing and development of this UWB module,"

commented Adam Benson, Inpixon CTO. "The proficiency gained from our current projects will inspire our pipeline of upcoming innovative products and associated software."

## About Inpixon

Inpixon® (Nasdaq: INPX) is the Indoor Intelligence™ company that specializes in capturing, interpreting and giving context to indoor data so it can be translated into actionable intelligence. The company's Indoor Intelligence platform ingests diverse data from IoT, third-party and proprietary sensors designed to detect and position active cellular, Wi-Fi, UWB and Bluetooth devices. Paired with a high-performance data analytics engine, patented algorithms, and advanced mapping technology, Inpixon's solutions are leveraged by a multitude of industries to do good with indoor data. This multidisciplinary depiction of indoor data enables users to increase revenue, decrease costs, and enhance safety. Inpixon customers can boldly take advantage of location awareness, analytics, sensor fusion and the Internet of Things (IoT) to uncover the untold stories of the indoors.
