EyeGate Pharmaceuticals Reports Full Year 2014 Financial Results

WALTHAM, Mass., March 31, 2015 (GLOBE NEWSWIRE) -- Eyegate Pharmaceuticals, Inc. (OTCBB:EYEG) ("EyeGate" or the "Company"), a specialty pharmaceutical company that focuses on developing and commercializing therapeutics and drug delivery systems for treating diseases of the eye, today announced its financial results for the year ended December 31, 2014.

Stephen From, President and CEO, stated, "With the proceeds of our initial public offering, we have the capital needed to advance our clinical development programs for EGP-437, a corticosteroid delivered to the ocular tissue via our proprietary iontophoresis platform, the EyeGate® II Delivery System. EGP-437 is being developed to treat non-infectious anterior uveitis and macular edema, two prevalent conditions affecting the front and back of the eye, respectively, and we believe that our technology provides substantive potential benefits to both patients and clinicians."

Mr. From continued, "The planned confirmatory Phase III trial of EGP-437 in anterior uveitis and Phase II trial in macular edema will each represent important milestones in our development path. More importantly, these trials are expected to provide significant validation for our iontophoresis technology platform and its ability to safely and effectively deliver drugs to the anterior and posterior segments of the eye. We look forward to further demonstrating the capabilities of this novel delivery technology, which we believe has paradigm shifting potential as it relates to improving the lives of patients with a variety of ophthalmic conditions."

2014 Full Year Financial Review

For the twelve month period ended December 31, 2014, net loss was approximately \$1.6 million. This compares to a net loss of approximately \$3.7 million in 2013.

Research and development expenses were approximately \$0.5 million for the year ended December 31, 2014 compared to approximately \$1.0 million for the year ended December 31, 2013. The reduction of approximately \$0.5 million was mainly due to a reduction in clinical trial activity related to the Company's EGP-437 Combination Product following the completion of the Company's first Phase III trial in non-infectious anterior uveitis. The Company expects research and development costs to increase in 2015, as it initiates a Phase II proof-of-concept trial of the EGP-437 Combination Product in macular edema.

General and administrative expenses for the year were approximately \$1.9 million, compared to approximately \$2.1 million in 2013.

Net cash used in operating activities was approximately \$1.0 million for the year ended December 31, 2014, compared to net cash used in operating activities of approximately \$3.0

million for the year ended December 31, 2013.

As of December 31, 2014, the Company had cash and cash equivalents of approximately \$167,000. The Company's cash position at the end of 2014 excludes net proceeds less transaction expenses of approximately \$2.7 million from its initial public offering, which was completed in February 2015.

About EyeGate

EyeGate is a clinical-stage specialty pharmaceutical company that is focused on developing and commercializing therapeutics and drug delivery systems for treating diseases of the eye. EGP-437, the Company's first and only product in clinical trials, incorporates a reformulated topically active corticosteroid, dexamethasone phosphate, that is delivered into the ocular tissues through EyeGate's proprietary innovative drug delivery system, the EyeGate(R) II Delivery System.
