ElectriPlast Conductive Plastics a Key Component of Advanced Optical Sensors

EVANSVILLE, Ind., Nov. 9, 2016 /PRNewswire/ --[Integral Technologies](#), Inc. (OTC-QB:ITKG) ("Integral"), an emerging light-weighting leader and its wholly owned subsidiary [ElectriPlast Corp.](#), today announced another completed order for its ElectriPlast conductive plastic, to [LeddarTech](#), a leader in the field of optical detection technology. ElectriPlast, as part of its ongoing relationship with LeddarTech, provides its proprietary conductive material used in molding LeddarTech's lens barrels for the LeddarOne Sensor Modules. With its precise distance measurement capabilities, the LeddarOne supports a variety of applications for commercial and consumer markets.

The recent LeddarOne successes include its adoption as an indoor/outdoor altimeter for commercial drones, allowing fixed wings and quadcopters to land safely, thanks to accurate height-above-ground data provided.

"We're pleased that ElectriPlast continues to meet the tolerance requirements for the LeddarOne and we will continue to explore ways to assist LeddarTech in the production of affordable, advanced sensing modules," stated Doug Bathauer, CEO of Integral. "We see our relationship with LeddarTech as a growth opportunity, as they understand the art and science of merging software, hardware and materials in ways to bring innovative products to market and further define their role as a leader in the solid-state LiDAR sensor industry."

About Integral Technologies, Inc.

Integral Technologies Inc. (OTC-BB:ITKG) and wholly owned subsidiary [ElectriPlast Corp.](#), engage in the discovery, development, and commercialization of electrically conductive hybrid plastics used primarily as raw materials in the production of industrial, commercial and consumer products and services worldwide. Its core material, ElectriPlast®, is a non-corrosive, electrically conductive resin-based material whose properties allow it to be molded into any of the infinite shapes and sizes associated with plastics, rubbers and other polymers while reducing component weight by 40 to 60%. Integral is a leader in conductive hybrid plastics with a broad Intellectual Property portfolio referencing its ElectriPlast technology. Applications for ElectriPlast include: Shielding Wire, Power Electronics, Connectors, and Cables; Shielding, Conduction, Batteries, Semiconductors, Heated Elements, Sensors, Antennas, Medical Devices, Consumer Electronics and Acoustics, Fuses, Capacitors, Resistors, RFID, Bus bars and Terminals.

About LeddarTech (www.leddartech.com)

LeddarTech is the developer and owner of Leddar, a patented LiDAR sensing technology that constitutes a novel approach in object detection and ranging. Developed over 10+ years of R&D, Leddar is a unique combination of advanced light wave signal processing and software algorithms that enables the development of highly customizable and cost-effective sensing devices for multiple markets such as automotive, drones, or industrial automation. LeddarTech is a spin-off of Canada's leading optics and photonics institute, INO.

LeddarTech, LeddarOne, and Leddar are trademarks or registered trademarks of LeddarTech Inc.

Safe Harbor Statement

This press release contains "forward-looking statements" within the meaning of Section 27A of the 1933 Securities Act and Section 21E of the 1934 Securities Exchange Act. These statements include, without limitation, predictions and guidance relating to the company's future financial performance and the research, development and commercialization of its technologies. In some cases, you can identify forward-looking statements by terminology such as, "may," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential," "continue," or the negative of these terms or other comparable terminology. These forward-looking statements are based on management's current expectations, but they involve a number of risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in the forward-looking statements, as the result of such factors, risks and uncertainties as (1) competition in the markets for the products and services sold by the company, (2) the ability of the company to execute its plans, (3) other factors detailed in the company's public filings with the SEC, including, without limitation, those described in the Company's annual report on Form 10-K for the year ended June 30, 2015 as filed with the Securities and Exchange Commission and available at www.sec.gov, and (4) the parties may be unable to agree upon definitive agreements. You are urged to consider these factors carefully in evaluating the forward-looking statements.
