DISCLAIMER

FORWARD LOOKING STATEMENTS

This document includes statements that are, or may be deemed to be, “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbors created by those laws. These forward-looking statements include information about possible or assumed future results of our operations. All statements, other than statements of historical facts, that address activities, events or developments that we expect or anticipate may occur in the future, including such things as our outlook (including bookings, adjusted revenue, and adjusted EBITDA), our product development and planning, our pipeline, future capital expenditures, financial results, the impact of regulatory changes, existing and evolving business strategies and acquisitions and dispositions, demand for our services and competitive strengths, goals, the benefits of new initiatives, growth of our business and operations, our ability to successfully implement our plans, strategies, objectives, expectations and intentions are forward-looking statements. Also, when we use words such as “may,” “will,” “would,” “anticipate,” “believe,” “estimate,” “expect,” “intend,” “plan,” “projects,” “forecasts,” “seeks,” “outlook,” “target,” “goals,” “probably,” or similar expressions, we are making forward-looking statements. Such statements are based upon the current beliefs and expectations of Skillsoft’s management and are subject to significant risks and uncertainties. Actual results may differ from those set forth in the forward-looking statements. All forward-looking disclosure is speculative by its nature.

There are important risks, uncertainties, events and factors that could cause our actual results or performance to differ materially from those in the forward-looking statements contained in this document, including:

- our ability to realize the benefits expected from the business combination between Skillsoft, Churchill Capital Corp. II, and Global Knowledge, and other recent transactions, including our acquisitions of Pluma and Codecademy;
- the impact of U.S. and worldwide economic trends, financial market conditions, geopolitical events, natural disasters, climate change, public health crises, the ongoing COVID-19 pandemic (including any variant), political crises, or other catastrophic events on our business, liquidity, financial condition and results of operations;
- our ability to attract and retain key employees and qualified technical and sales personnel;
- our reliance on third parties to provide us with learning content, subject matter expertise, and content productions and the impact on our business if our relationships with these third parties are terminated;
- fluctuations in our future operating results;
- our ability to successfully identify, consummate, and achieve strategic objectives in connection with our acquisition opportunities and realize the benefits expected from the acquisition;
- the demand for, and acceptance of, our products and for cloud-based technology learning solutions in general;
- our ability to compete successfully in competitive markets and changes in the competitive environment in our industry and the markets in which we operate;
- our ability to market existing products and develop new products;
- a failure of our information technology infrastructure or any significant breach of security, including in relation to the migration of our key platforms from our systems to cloud storage;
- future regulatory, judicial, and legislative changes in our industry;
- our ability to comply with laws and regulations applicable to our business;
- a failure to achieve and maintain effective internal control over financial reporting;
- fluctuations in foreign currency exchange rates;
- our ability to protect or obtain intellectual property rights;
- our ability to raise additional capital;
- the impact of our indebtedness on our financial position and operating flexibility;
- our ability to meet future liquidity requirements and comply with restrictive covenants related to long-term indebtedness;
- our ability to successfully defend ourselves in legal proceedings; and
- our ability to continue to meet applicable listing standards.

The foregoing list of factors is not exhaustive and new factors may emerge from time to time that could also affect actual performance and results. For more information, please see the risk factors included in the Company’s S-1 amendment filed on July 29, 2021 and subsequent filings with the SEC including our Form 10-K to be filed with the SEC for the fiscal year ended January 31, 2022.

Although we believe that the assumptions underlying our forward-looking statements are reasonable, any of these assumptions, and therefore also the forward-looking statements based on these assumptions, could themselves prove to be inaccurate. Given the significant uncertainties inherent in the forward-looking statements included in this document, our inclusion of this information is not a representation or guarantee by us that our objectives and plans will be achieved. Annualized, pro forma, projected, and estimated numbers are used for illustrative purpose only, are not forecasts and may not reflect actual results. Additionally, statements as to market share, industry data, and our market position are based on the most currently available data available to us and our estimates regarding market position or other industry data included in this document or otherwise discussed by us involve risks and uncertainties and are subject to change based on various factors, including as set forth above.

Our forward-looking statements speak only as of the date made and we will not update these forward-looking statements unless required by applicable law. With regard to these risks, uncertainties, and assumptions, the forward-looking events discussed in this document may not occur, and we caution you against unduly relying on these forward-looking statements.

DISCLAIMER (CONTINUED)

NON-GAAP FINANCIAL MEASURES AND KEY PERFORMANCE METRICS

We track several non-GAAP financial measures and key performance metrics that we believe are key financial measures of our success. Non-GAAP measures and key performance metrics are frequently used by securities analysts, investors, and other interested parties in their evaluation of companies comparable to us, many of which present non-GAAP measures and key performance metrics when reporting their results. These measures can be useful in evaluating our performance against our peer companies because we believe the measures provide users with valuable insight into key components of U.S. GAAP financial disclosures. For example, a company with higher U.S. GAAP net income may not be as appealing to investors if its net income is more heavily comprised of gains on asset sales. Likewise, excluding the effects of interest income and expense moderates the impact of a company's capital structure on its performance. However, non-GAAP measures and key performance metrics have limitations as analytical tools. Because not all companies use identical calculations, our presentation of non-GAAP financial measures and key performance metrics may not be comparable to other similarly titled measures of other companies. They are not presentations made in accordance with U.S. GAAP, are not measures of financial condition or liquidity, and should not be considered as an alternative to profit or loss for the period determined in accordance with U.S. GAAP or operating cash flows determined in accordance with U.S. GAAP. As a result, these performance measures should not be considered in isolation from, or as a substitute analysis for, results of operations as determined in accordance with U.S. GAAP. We do not reconcile our forward-looking non-GAAP financial measures to the corresponding U.S. GAAP measures, due to variability and difficulty in making accurate forecasts and projections and/or certain information not being ascertainable or accessible; and because not all of the information necessary for a quantitative reconciliation of these forward-looking non-GAAP financial measures to the most directly comparable U.S. GAAP financial measure is available to us without unreasonable efforts. For the same reasons, we are unable to address the probable significance of the unavailable information. We provide non-GAAP financial measures that we believe will be achieved, however we cannot accurately predict all of the components of the adjusted calculations and the U.S. GAAP measures may be materially different than the non-GAAP measures.

Key Performance Metrics

We use key performance metrics to help us evaluate our performance and make strategic decisions. Additionally, we believe these metrics are useful as a supplement to investors in evaluating the Company's ongoing operational performance and trends. These key performance metrics are not based on any standardized methodology prescribed by GAAP and are not necessarily comparable to similarly-titled metrics presented by other companies.

Annualized Recurring Revenue

Annualized Recurring Revenue ("ARR"). Represents the annualized recurring value of all active subscription contracts at the end of a reporting period. We believe ARR is useful for assessing the performance of our recurring subscription revenue base and identifying trends affecting our business.

Dollar Retention Rate

Dollar Retention Rate ("DRR"). For existing customers at the beginning of a given period, DRR represents subscription renewals, upgrades, churn, and downgrades in such period divided by the beginning total renewable base for such customers for such period. Renewals reflect customers who renew their subscription, inclusive of auto-renewals for multi-year contracts, while churn reflects customers who choose to not renew their subscription. Upgrades include orders from customers that purchase additional licenses or content (e.g., a new Leadership and Business module), while downgrades reflect customers electing to decrease the number of licenses or reduce the size of their content package. Upgrades and downgrades also reflect changes in pricing. We use our DRR to measure the long-term value of customer contracts as well as our ability to retain and expand the revenue generated from our existing customers.

Bookings

Bookings. Bookings (previously referred to as Order Intake) in any particular period represents orders received during that period and reflects (i) subscription renewals, upgrades, churn, and downgrades to existing customers, (ii) non-subscription services, and (iii) sales to new customers. Bookings generally represents a customer's annual obligation (versus the life of the contract), and, for the subscription business, revenue is recognized for such Bookings over the following 12 months. We use Bookings to measure and monitor current period business activity with respect to our ability to sell subscriptions and services to our platform.

COMMENTARY

- Finished at or above upper end of raised FY22 guidance ranges for Bookings and Adjusted Revenue. Met raised Adjusted EBITDA guidance.
- Majority of Skillsoft Bookings generated in second half of each year due to customer renewal timing
- Significant shift from legacy Classroom Training to Digital Offerings at Global Knowledge
- FY21 adversely impacted by:
 - COVID dislocation
 - Long-term benefit given acceleration of Global Knowledge's transition from in-classroom training to digital offerings
 - Churn from legacy Skillport Platform

Notes:

Reconciliation of non-GAAP financial measures provided in Appendix.
