# **Duos Technologies Group Completes Integration of AMAG Technology's Symetry Access Control System**

## **Innovation Technology Expands Centraco 3.0 Command and Control Platform System Expansion Includes Critical System Upgrades**

JACKSONVILLE, FL -- (Marketwired) -- 08/13/15 -- Duos Technologies Group (OTCQB: DUOT), a provider of intelligent security analytical technology solutions, announces completion of a new integration solution for AMAG Technology's Symetry access control system.

The modular integration expands the capabilities of Duos Technologies Group's Physical Security Information Management ("PSIM") component of the centraco 3.0 platform, which now offers its users seamless control of AMAG's door controllers paired with any standard card and biometric readers from HID and other manufactures. The centraco platform, acting as a central processing hub for signals from a virtually unlimited number of disparate sub-systems, intelligently enhances signals received from access control devices attached to Symetry by mapping the data source to metadata from real-time video feeds originating at the event location.

The centraco platform, acting as a central control unit, enables operators to manage system-wide door access from a single interface.

"We are excited about our latest integration solution for our centraco™ PSIM platform, which efficiently consumes data streams from AMAG's Symetry and enhances them with live camera views, navigable maps and other relevant metadata. centraco™ PSIM platform serves as a unified access control management system, giving operators full-featured, but permission-driven control over their doors," said David Ponevac, Executive Vice President and CTO of Duos Technologies Group.

Gianni Arcaini, Duos Technologies Group Chairman and CEO, stated, "The integration of third-party access control technologies is an important part of our strategy of maximizing and expanding the capabilities and features of our centraco™ platform. Our software development timeline prioritizes on manufacturers with a significant market share."

Centraco 3.0 intelligently connects information from a virtually unlimited number of connected devices, sub-systems and data streams into a single central command and control user interface.

### ***Duos Technologies Group, Inc.***

Duos Technologies Group, Inc. (OTCQB: DUOT), based in Jacksonville, FL, provides intelligent security analytical technology solutions with a strong portfolio of intellectual

property. The Company's core competencies include advanced intelligent technologies that are delivered through its proprietary integrated enterprise command and control platform, centraco™. The Company provides its broad range of technology solutions with an emphasis on mission critical security, inspection and operations within the rail, utilities, petrochemical, healthcare, and hospitality sectors.
