# Artelo Biosciences Reports Second Quarter Fiscal 2021 Financial Results and Provides Business Update

*Recently Commenced Patient Enrollment in Phase 1/2 CAReS Study of ART27.13 in the UK*

*Reported Positive Pre-Clinical Data Associated with Artelo's Proprietary CBD Cocrystal*

*\$11.2 Million of Cash and Cash Equivalents and Marketable Securities as of February 28, 2021*

LA JOLLA, Calif., April 13, 2021 (GLOBE NEWSWIRE) -- [Artelo Biosciences, Inc.](https://www.artelobiosciences.com) (NASDAQ: [ARTL](https://www.artelobiosciences.com)), a clinical stage biopharmaceutical company focused on the development of therapeutics that target lipid-signaling pathways, including the endocannabinoid system, today reported financial and operating results for the second quarter of its fiscal year ended February 28, 2021 and provided a business update.

"We are pleased to report continued clinical and corporate progress during the second quarter of 2021," stated Gregory D. Gorgas, President and Chief Executive Officer of Artelo Biosciences. "Most recently, we dosed the first patient in our Phase 1/2 Cancer Appetite Recovery Study (CAReS) of ART27.13, marking a major milestone for Artelo. We believe ART27.13 has the potential to become a standard of care treatment for cancer anorexia, a wasting syndrome associated with significant weight loss that affects more than 60% of all cancer patients and is a leading cause of mortality in this population. Our goal is to complete the study within approximately twelve months, and we anticipate announcing meaningful clinical updates as we advance through the trial."

During the quarter, the Company announced positive pre-clinical data associated with its proprietary CBD cocrystal, ART12.11, showing potential pharmacodynamic interactions of its components, cannabidiol (CBD) and tetramethylpyrazine (TMP), in cell-based models of cancer. The study observed enhanced effects between CBD and TMP versus either compound alone, reinforcing Artelo's CBD cocrystal's potential for improved efficacy and differentiation from other forms of CBD. The full data is expected to be disclosed at a future scientific conference.

"We ended the quarter with approximately \$11.2 million of cash and cash equivalents, and marketable securities, which provides us more than sufficient runway to execute on a number of key upcoming milestones that we believe have the potential to drive significant value for shareholders," added Randy Schreckhise, Vice President Finance and Operations. "At the same time, we continue to expand our senior management and board of directors with key additions, as well as enhance our intellectual property protection with additional patent filings," continued Mr. Schreckhise. "We believe we have built a robust therapeutic

pipeline addressing underserved, multi-billion dollar markets and we remain highly encouraged by the outlook for the business.”

### **Second Quarter Fiscal 2021 Highlights:**

- Announced positive laboratory data associated with proprietary CBD cocrystal demonstrating co-administration of CBD and TMP could confer ART12.11 with a more desirable pharmacodynamic profile.
- Announced non-clinical research collaboration with Trinity College Dublin, Ireland to further investigate ART27.13 for the treatment of cancer cachexia.
- Filed a composition of matter patent application regarding a new solid dosage formulation, including its method of use, with the UK Patent Office for ART27.13.
- Appointed Andrew Yates, Ph.D. as Senior Vice President and Chief Scientific Officer.
- Appointed Tamara A. Seymour, CPA, and Gregory R. Reyes, M.D., Ph.D. to Artelo’s Board of Directors.

### **Second Quarter Fiscal 2021 Financial Results:**

- Operating expenses for the three months ended February 28, 2021 were \$1,867,509 compared to \$1,370,534 for the same period in 2020. The company’s operating expenses were primarily related to professional fees for ongoing regulatory requirements, research and development and general and administrative expenses.
- Net loss was approximately \$1,865,921, or \$0.11 per basic and diluted share for the quarter ended February 28, 2021 compared to a net loss of \$1,370,126, or \$0.40 per basic and diluted share for the quarter ended February 29, 2020.
- As of February 28, 2021, the Company has approximately \$11,218,461 in cash and cash equivalents and marketable securities.

### **About Artelo Biosciences**

Artelo Biosciences, Inc. is a San Diego-based biopharmaceutical company dedicated to the development and commercialization of proprietary therapeutics targeting lipid signaling pathways including the endocannabinoid system. Artelo is rapidly advancing a portfolio of broadly applicable product candidates designed to address significant unmet needs in multiple diseases and conditions, including anorexia, cancer, PTSD, pain, and inflammation. Led by proven biopharmaceutical executives collaborating with highly respected researchers and technology experts, the company applies leading edge scientific, regulatory, and commercial discipline to develop high-impact therapies.
