The Electric and Hybrid Vehicle Technology Expo is the industry's largest free-to-attend exhibition and networking event, complete with notable keynote speakers and innovative workshops. EHVTE showcases manufacturing solutions across the entire EV supply chain including electrical powertrains and components, battery management systems, materials and equipment.

Axalta's Energy Solutions business will feature its full line of Voltatex products at 2017 Electric & Hybrid Vehicle Technology Expo (Graphic:

"We look forward to

Axalta)

another opportunity to
share our latest low

emission energy solutions with the EV community,” said Rich Munson, Axalta North America Sales Manager. “Last year’s expo was a great success and we hope to continue the same momentum.”

For more than 70 years, Axalta has been an international leader in the development of high-quality and high-performance insulation coatings. Axalta electrical steel coatings, wire enamels, and impregnating resins are designed to fulfill the demand for modern and environmentally conscious materials in the EV industry. The products are made worldwide to serve Axalta’s global customer base.

Voltatex is a part of Axalta’s Energy Solutions business, which provides coating materials for manufacturers of electrical equipment segments including energy generation, transformation and distribution, industrial motors, household appliances and power tools, automotive components, and electrical motors for the power-train of electric and hybrid vehicles.
