Green Scientific Labs Assessed for Initial ISO/IEC 17025 Accreditation for its New Jersey Laboratory

DAVIE, Fla., July 12, 2022 /PRNewswire/ -- Green Scientific Labs Holdings Inc. ("Green Scientific Labs" or the "Company"), leading multi-state provider of innovative cannabis and hemp testing technologies and methods, was assessed on Thursday, July 7 by an ISO accreditation body for its initial accreditation. Similar to the previous two audits to its other locations in Davie, Florida and Phoenix, Arizona, the Company's New Jersey laboratory met all expectations, and the inspection did not yield a single negative observation (finding), according to the ISO accreditation body. It was recommended for ISO/IEC 17025:2017 accreditation as outlined by the joint ISO-ILAC-IAF Communiqué and met the requirements of the AOAC International Guidelines for Laboratories performing Microbiological and Chemical Analyses of Food and Pharmaceuticals (2018).

"The laboratory facility buildout is complete; equipment is being installed and qualified in preparation for scope expansion to include the many methods Green Scientific Labs performs nationwide. We are excited about this accomplishment and looking forward to receiving the certification in the second half of 2022," said Rafael Bombonato, Chief Compliance Officer of Green Scientific Labs.

The laboratory is continuing to meet the New Jersey state requirements for licensure. It is expected to obtain the required licenses soon to start testing medicinal and recreational cannabis samples to ensure accuracy, safety, and quality.

Since its inception, Green Scientific Labs has been diligently working on ensuring it has a corporate culture where laboratory operations have built-in quality and compliance. The hard work has been authenticated by the consecutive perfect audit results and our third ISO/IEC 17025:2017 accreditation.
