Airgain Expands Line of 5G Antennas with New RECON13™ Ultra-Low-Profile Rugged Antenna

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of wireless connectivity solutions that creates and delivers embedded components, external antennas, and integrated systems across the globe, today announced the launch of its new RECON13™ 5G antenna, which expands its popular line of rugged outdoor 5G antennas designed for fleet and public safety vehicles and assets. This is the first entry in a new series of ultra-low-profile antennas designed for applications that require maximum connectivity with minimum space.

The RECON13 5G is designed to provide high performance LTE and 5G connectivity. The unit's extremely low profile makes it more covert and less obstructive to vehicle light bars and other roof-mounted equipment. With up to 13 elements, this antenna is one of the most versatile on the market and is compatible with, and connects to, virtually any vehicular router or modem.

Airgain's RECON13 5G antenna features a 13-in-1 configuration that supports up to four LTE/5G cellular elements, up to eight Wi-Fi 6/6E/7 elements and offers an optional Global Navigation Satellite System (GNSS) element for GPS location services. It also features both IP67 and IP69K certification, making it built to withstand the toughest environmental hazards. Coupled with the EZConnect™ cable harness, it allows for quick and easy customization and integration with onboard devices. In addition, like all mobile antennas from Airgain, it is also covered by an industry-leading 5-year limited warranty.

"We consistently hear about the importance of stealth and flexibility from our public safety customers, whether for covert operations, for vandalism deterrence, or to minimize the overall footprint of their connectivity equipment," said Brian Critchfield, Vice President of Global Marketing for Airgain. "The RECON13 offers 5G connectivity as well as the most antenna elements in a single low-profile housing. It is flexible enough to provide connectivity for applications that reach far beyond fleets, making it a game changing new entry into the market."

About Airgain, Inc.

Airgain is a leading provider of wireless connectivity solutions that creates and delivers embedded components, external antennas, and integrated systems across the globe. Airgain simplifies wireless connectivity across a diverse set of devices and markets, from solving complex connectivity issues to speeding time to market to enhancing wireless signals. Our product offering includes three distinct sub-brands. Airgain Embedded represents our embedded modems, antennas, and development kits designed to help

design teams quickly bring connected products to market. Airgain Integrated represents our fully integrated, off-the-shelf products, such as our asset trackers and AirgainConnect® platform, that help solve connectivity issues in an organization's operating environment. Airgain Antenna+ represents our external antennas, such as our fleet, Internet of Things (IoT) antennas, and network antennas that help enhance wireless signals in some of the harshest environments. Our mission is to connect the world through optimized, integrated wireless solutions. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the expected outcomes of the development, time to market, the performance of, and the demand and market for, Airgain's products or those of its partners. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our products is developing and may not develop as we expect; risks associated with the performance of our products, including bundled solutions with third-party products; if [our channel partners fail to perform, or] our partnerships are unsuccessful, we may not be able to bring our product solutions to market successfully or on a timely basis; our products are subject to intense competition, and competitive pressures from existing and new companies may harm our business, sales, growth rates and market share; risks associated with quality and timing in manufacturing our products and our reliance on third-party manufacturers; we may not be able to maintain strategic collaborations under which our bundled solutions are offered; if we cannot protect our intellectual property rights, our competitive position could be harmed or we could incur significant expenses to enforce our rights; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission (SEC), including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
