Airgain's 5G Lantern™ Wireless Device Certified for Use by Top Mobile Operators

Airgain's outdoor 5G Lantern™ fixed wireless access (FWA) solution has received industry accreditation for use across North America

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of wireless connectivity solutions, has been certified by top mobile network operators and industry bodies for its Lantern™ device for use in the United States and Canada.

The robust, high performance, and enterprise grade outdoor customer premise equipment (CPE) enables fixed broadband internet access using 5G wireless technology and includes EZ Installation features that make it easier for service providers, systems integrators, and enterprise users to deliver reliable, high-speed 5G/LTE connectivity.

Mobile operators AT&T and T-Mobile have now certified Lantern™ on their respective networks, and industry bodies - the Federal Communications Commission (FCC), PCS Type Certification Review Board (PTCRB), and Industry Canada (IC) - have also approved the solution, allowing it to be sold across North America.

Service providers and systems integrators will also have remote management capability through a TR-069 cloud interface. Lastly, Lantern's EZ Installation kit includes a web-based interface to automatically determine the direction of the best received and transmitted 5G signal and allows users to adjust the direction of the device to maximize signal strength.

Lance Laing, Airgain's Vice President of US Sales, said: "Lantern™ 5G Outdoor FWA delivers a high-performance, rugged, simplified installation, and cost effective solution for 5G connectivity in small to large enterprise, rural, and residential applications."

Airgain's outdoor 5G Lantern™ fixed wireless access (FWA) is available for purchase. More information about the technology can be found [here](#).

About Airgain, Inc.

Airgain simplifies wireless connectivity across a diverse set of devices and markets, from solving complex connectivity issues to speeding time to market to enhancing wireless signals. Our products are offered in three distinct sub-brands: Airgain Embedded, Airgain Integrated and Airgain Antenna+.

Our mission is to connect the world by making wireless simple. Airgain's expertise in custom cellular and antenna system design pairs with our focus on high-growth technologies and our dedication to simplify the growing complexity of wireless. With a broad portfolio of products across the value chain, from embedded components to fully integrated products,

we are equipped to solve critical connectivity needs in both the design process and the operating environment across the enterprise, automotive, and consumer markets. Airgain is headquartered in San Diego, California.
