Cautionary Note Regarding Forward-Looking Statements. This presentation contains, and our officers and representatives may from time to time make, “forward-looking statements” within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Forward-looking statements can be identified by words such as: “anticipate,” “intend,” “plan,” “goal,” “seek,” “believe,” “project,” “estimate,” “expect,” “strategy,” “future,” “likely,” “may,” “should,” “will” and similar references to future periods. Examples of forward-looking statements include, among others, statements we make regarding: (i) expected operating results, such as revenue growth and earnings, including upon the continued integration of CSI Compressco LP (“CSI Compressco”) into our operations, and our ability to service our indebtedness; (ii) anticipated levels of capital expenditures and uses of capital; (iii) current or future volatility in the credit markets and future market conditions; (iv) potential or pending acquisition transactions or other strategic transactions, the timing thereof, the receipt of necessary approvals to close such acquisitions, our ability to finance such acquisitions, and our ability to achieve the intended operational, financial, and strategic benefits from any such transactions; (v) expectations of the effect on our financial condition of claims, litigation, environmental costs, contingent liabilities and governmental and regulatory investigations and proceedings; (vi) production and capacity forecasts for the natural gas and oil industry; (vii) strategy for customer retention, growth, fleet maintenance, market position and financial results; (viii) our interest rate hedges; and (ix) strategy for risk management.

Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not place undue reliance on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: (i) a reduction in the demand for natural gas and oil and/or a decrease in natural gas and oil prices; (ii) the loss of, or the deterioration of the financial condition of, any of our key customers; (iii) nonpayment and nonperformance by our customers, suppliers or vendors; (iv) competitive pressures that may cause us to lose market share; (v) the structure of our Contract Services contracts and the failure of our customers to continue to contract for services after expiration of the primary term; (vi) our ability to successfully integrate any acquired businesses, including CSI Compressco, and realize the expected benefits thereof in the expected timeframe or at all; (vii) our ability to fund purchases of additional compression equipment; (viii) our ability to successfully implement our share repurchase program; (ix) a deterioration in general economic, business, geopolitical or industry conditions, including as a result of the conflict between Russia and Ukraine, the Israel-Hamas war, and the hostilities in the Middle East, inflation, and slow economic growth in the United States; (x) a downturn in the economic environment, as well as continued inflationary pressures; (xi) international operations and related mobilization and demobilization of compression units, operational interruptions, delays, upgrades, refurbishment and repair of compression assets and any related delays and costs overruns or reduced payment of contracted rates; (xii) our ability to successfully manage our international operations and comply with any applicable laws and regulations, including risks associated with doing business in foreign countries, and our ability to comply with the U.S. Foreign Corrupt Practices Act (“FCPA”) or other anti-corruption laws; (xiii) the outcome of any pending internal review or any future related government enforcement actions; (xiv) tax legislation and the impact of changes to applicable tax laws, including the passage of the One Big Beautiful Bill Act, and administrative initiatives or challenges to our tax positions; (xv) the loss of key management, operational personnel or qualified technical personnel; (xvi) our dependence on a limited number of suppliers; (xvii) the cost of compliance with existing and new governmental regulations, as well as the associated uncertainty given the new U.S. federal government administration; (xviii) changes in trade policies and regulations, including increases or changes in duties, current and potentially new tariffs and other actions; (xix) the cost of compliance with regulatory initiatives and stakeholders’ pressures, including sustainability and corporate responsibility; (xx) the inherent risks associated with our operations, such as equipment defects and malfunctions; (xxi) our reliance on third-party components for use in our IT systems; (xxii) legal and reputational risks and expenses relating to the privacy, use and security of employee and client information; (xxiii) threats of cyber-attacks or terrorism; (xxiv) agreements that govern our debt contain features that may limit our ability to operate our business and fund future growth and also increase our exposure to risk during adverse economic conditions; (xxv) volatile and/or elevated interest rates and associated central bank policy actions; (xxvi) our ability to access the capital and credit markets or borrow on affordable terms (or at all) to obtain additional capital that we may require; (xxvii) major natural disasters, severe weather events or other similar events that could disrupt operations; (xxviii) unionization of our labor force, labor interruptions and new or amended labor regulations; (xxix) renewal of insurance; (xxx) the effectiveness of our disclosure controls and procedures; and (xxxi) such other factors as discussed throughout the “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” sections and elsewhere in our Annual Report on Form 10-K for the year ended December 31, 2024, filed with the U.S. Securities and Exchange Commission (“SEC”) on March 7, 2025, as may be updated by subsequent filings under the Securities Exchange Act of 1934, as amended, including Forms 10-Q and 8-K, each of which can be obtained free of charge on the SEC’s website at <http://www.sec.gov>. Any forward-looking statement made by us in this presentation is based only on information currently available to us and speaks only as of the date on which it is made. Except as may be required by applicable law, we undertake no obligation to publicly update any forward-looking statement whether as a result of new information, future developments or otherwise.

Non-GAAP Financial Measures. This presentation contains certain financial measures not presented in accordance with generally accepted accounting principles (“GAAP”), including Adjusted Gross Margin, Adjusted Gross Margin percentage, Adjusted EBITDA, Adjusted EBITDA percentage, Discretionary Cash Flow and Free Cash Flow. Such non-GAAP measures should not be considered an alternative to, or more meaningful than, the most directly comparable measure of financial performance presented in accordance with GAAP. Moreover, such non-GAAP measures may not be comparable to similarly titled measures of other companies. However, we believe these non-GAAP financial measures provide useful information to investors because, when viewed with our GAAP results and the accompanying reconciliation, they provide a more complete understanding of our performance than GAAP results alone. See the Supplemental Slides for reconciliation of non-GAAP measures.

Industry & Market Data. The market data and certain other statistical information used throughout this presentation are based on independent industry publications, government publications or other published independent sources. Although we believe these third-party sources are reliable as of their respective dates, we have not independently verified the accuracy or completeness of this information. Some data is also based on our good faith estimates and our management’s understanding of industry conditions. The industry in which we operate is subject to a high degree of uncertainty and risk due to a variety of factors. These and other factors could cause results to differ materially from those expressed in these publications.

Intellectual Property. This presentation contains trademarks, trade names and service marks of other companies, which are the property of their respective owners. We do not intend our use or display of other parties’ trademarks, trade names or service marks to imply, and such use or display should not be construed to imply, a relationship with, or endorsement or sponsorship of us by, these other parties.

Kodiak Investment Thesis

Constructive Industry Fundamentals

- ▶ Highly visible, multi-year domestic natural gas demand growth
- ▶ Tight equipment market with industry-wide capital discipline

Compression Market Leader

- ▶ 4.4 million horsepower compression fleet¹
- ▶ Market leader in the Permian

Robust Organic Investment Opportunities

- ▶ 2025 new unit growth capex is fully contracted
- ▶ Compelling returns on new equipment deployments

Stable and Growing Cash Flow

- ▶ Fixed-revenue contracts with inflation escalators
- ▶ No direct commodity price exposure

Attractive Shareholder Return Program

- ▶ 5.5% dividend yield; 10% dividend increase in 2025²
- ▶ \$65 million of availability on share repurchase program³

Second Quarter 2025 Highlights

Adjusted EBITDA¹ (\$M)

Discretionary Cash Flow¹ (\$M)

Net Income (\$M)

Attributable to Common Shareholders

Second Quarter Highlights

- ▶ Reported record quarterly Adj. EBITDA of \$178.2 million
- ▶ Generated record quarterly free cash flow of \$70 million
- ▶ Announced \$100 million increase in share repurchase plan
- ▶ Repurchased ~\$10 million of stock during Q2 2025
- ▶ Raised full-year 2025 discretionary cash flow guidance
- ▶ Declared quarterly dividend of \$0.45 per share

Revenue-Generating HP (in 000)²

32K HP

New unit horsepower added in the quarter

Investing In Our People

BEARS Academy

- ▶ Offers ~40 technical training courses
- ▶ Utilizes virtual reality training modules
- ▶ Constructing new 37,000 square foot hands-on training facility

IGNITE Development Program

- ▶ Four-month internship program for entry level field technicians
- ▶ Weekly rotations provide exposure to various operations & geographies
- ▶ High conversion to full time roles

AMPED Development Program

- ▶ Two-year rotational program to develop future leaders
- ▶ Provides exposure to many different aspects of the business
- ▶ Potential to fast-track to a management role

Hiring the Right People + Providing the Tools & Knowledge = Superior Execution

Continuous Innovation

Kodiak Connect Monitoring Platform

- ▶ Monitoring telemetry on 120+ data points per unit
- ▶ AI-enabled sensors and failure detection models
- ▶ Ability to track performance trends over time

Kodiak Fleet Reliability Center

- ▶ Staffed 24/7 with former operations leaders and field technicians
- ▶ Ability to monitor every compression unit in Kodiak's fleet
- ▶ Constant communication with operations team to identify potential problems before they lead to downtime

Supplemental Slides

Non-GAAP Financial Measures

Adjusted Gross Margin and Adjusted Gross Margin Percentage

Adjusted Gross Margin and Adjusted Gross Margin Percentage are considered non-GAAP financial measures. We define Adjusted Gross Margin as revenue less cost of operations, exclusive of depreciation and amortization expense. We define Adjusted Gross Margin Percentage as Adjusted Gross Margin divided by total revenues. We believe that Adjusted Gross Margin is useful as a supplemental measure of our operating profitability. Adjusted Gross Margin is impacted primarily by the pricing trends for service operations and cost of operations, including labor rates for service technicians, volume and per compression unit costs for lubricant oils and coolants, quantity and pricing of routine preventative maintenance on compression units and property tax rates on compression units. Adjusted Gross Margin should not be considered an alternative to, or more meaningful than, gross margin or any other measure of financial performance presented in accordance with GAAP. Moreover, Adjusted Gross Margin as presented may not be comparable to similarly titled measures of other companies. Because we capitalize assets, depreciation and amortization of equipment is a necessary element of our costs. To compensate for the limitations of Adjusted Gross Margin as a measure of our performance, we believe that it is important to consider gross margin determined under GAAP, as well as Adjusted Gross Margin, to evaluate our operating profitability.

Adjusted EBITDA and Adjusted EBITDA Percentage

Adjusted EBITDA and Adjusted EBITDA Percentage are considered non-GAAP measures. We define Adjusted EBITDA as net income (loss) before interest expense; income tax expense; and depreciation and amortization; plus (i) loss on extinguishment of debt; (ii) loss (gain) on derivatives; (iii) equity compensation expense; (iv) severance expenses; (v) transaction expenses; (vi) loss (gain) on sale of assets; and (vii) impairment of compression equipment. We define Adjusted EBITDA Percentage as Adjusted EBITDA divided by total revenues. Adjusted EBITDA and Adjusted EBITDA Percentage are used as supplemental financial measures by our management and external users of our financial statements, such as investors, commercial banks and other financial institutions, to assess:

- the financial performance of our assets without regard to the impact of financing methods, capital structure or historical cost basis of our assets;
- the viability of capital expenditure projects and the overall rates of return on alternative investment opportunities;
- the ability of our assets to generate cash sufficient to make debt payments and pay dividends; and
- our operating performance as compared to those of other companies in our industry without regard to the impact of financing methods and capital structure.

We believe that Adjusted EBITDA and Adjusted EBITDA Percentage provide useful information because, when viewed with our GAAP results and the accompanying reconciliation, they provide a more complete understanding of our performance than GAAP results alone. We also believe that external users of our financial statements benefit from having access to the same financial measures that management uses in evaluating the results of our business.

Adjusted EBITDA and Adjusted EBITDA Percentage should not be considered as alternatives to, or more meaningful than, revenues, net income (loss), operating income, cash flows from operating activities or any other measure of financial performance presented in accordance with GAAP as measures of operating performance and liquidity. Moreover, our Adjusted EBITDA and Adjusted EBITDA percentage as presented may not be comparable to similarly titled measures of other companies.

Given we are a capital-intensive business, depreciation, impairment of compression equipment and the interest cost of acquiring compression equipment are necessary elements of our costs. To compensate for these items, we believe that it is important to consider both net income (loss) and net cash provided by operating activities determined under GAAP, as well as Adjusted EBITDA and Adjusted EBITDA Percentage, to evaluate our financial performance and our liquidity. Our Adjusted EBITDA and Adjusted EBITDA percentage exclude some, but not all, items that affect net income (loss) and net cash provided by operating activities, and these measures may vary among companies. Management compensates for the limitations of Adjusted EBITDA and Adjusted EBITDA percentage as an analytical tool by reviewing the comparable GAAP measures, understanding the differences between the measures and incorporating this knowledge into management's decision-making processes.

Discretionary Cash Flow

Discretionary Cash Flow is considered a non-GAAP measure. We define Discretionary Cash Flow as net cash provided by operating activities less (i) maintenance capital expenditures; (ii) certain changes in operating assets and liabilities; and (iii) certain other expenses; plus (w) cash loss on extinguishment of debt; (x) severance expenses; and (y) transaction expenses. We believe Discretionary Cash Flow is a useful liquidity and performance measure and supplemental financial measure for us in assessing our ability to pay cash dividends to our stockholders, make growth capital expenditures and assess our operating performance. Our ability to pay dividends is subject to limitations due to restrictions contained in our ABL Credit Agreement, as further described elsewhere herein. Discretionary Cash Flow is presented for supplemental informational purposes only and should not be considered a substitute for financial information presented in accordance with GAAP, such as revenues, net income (loss), operating income (loss) or cash flows from operating activities. Discretionary Cash Flow as presented may not be comparable to similarly titled measures of other companies.

Free Cash Flow

We define Free Cash Flow as net cash provided by operating activities less (i) maintenance capital expenditures; (ii) certain changes in operating assets and liabilities; (iii) certain other expenses; and (iv) growth and other capital expenditures; plus (w) cash loss on extinguishment of debt; (x) severance expenses; (y) transaction expenses; and (z) proceeds from sale of assets. We believe Free Cash Flow is a liquidity measure and useful supplemental financial measure for us in assessing our ability to pursue business opportunities and investments to grow our business and to service our debt. Free Cash Flow is presented for supplemental informational purposes only and should not be considered a substitute for financial information presented in accordance with GAAP, such as revenues, net income (loss), operating income (loss) or cash flows from operating activities. Free Cash Flow as presented may not be comparable to similarly titled measures of other companies.
