Additionally, the second quarter of fiscal 2012 GAAP and Non-GAAP results included the results of Qualcomm Atheros, Inc., which was acquired in the third quarter of fiscal 2011. The second quarter of fiscal 2011 GAAP and Non-GAAP results included \$401 million in revenues relating to prior quarters as a result of agreements entered into with two licensees to settle disputes.

N/M - Not Meaningful

Non-GAAP research and development (R&D) expenses increased 30 percent y-o-y primarily due to an increase in investments in the development of integrated circuit products (including connectivity products), next-generation technologies and other initiatives to support the acceleration of advanced wireless products and services.

N/M - Not Meaningful

Non-GAAP selling, general and administrative (SG&A) expenses increased 13 percent y-o-y primarily due to increases in costs relating to legal matters, employee-related expenses, patent-related expenses and selling and marketing expenses, partially offset by a decrease in charitable donations. In the second quarter of fiscal 2011, we made a contribution to the Qualcomm Charitable Foundation in connection with the establishment of that entity.

### **Effective Income Tax Rates**

Our fiscal 2012 effective income tax rates are estimated to be approximately 18 percent for GAAP and approximately 18 to 19 percent for Non-GAAP. The second quarter effective income tax rates for GAAP and Non-GAAP were both 17 percent, which are lower than the estimated annual effective tax rates, primarily due to changes in our estimates related to certain permanent differences and foreign earnings taxed at rates that are less than the United States federal tax rate.

### **Qualcomm Strategic Initiatives**

The QSI segment makes strategic investments, many of which are in early-stage companies, and holds wireless spectrum. QSI also includes the discontinued operations of our FLO TV business. GAAP results for the second quarter of fiscal 2012 included \$0.41 earnings per share for the QSI segment. QSI results for the second quarter of fiscal 2012 included a \$1.2 billion gain in discontinued operations, or \$0.44 earnings per share, associated with the sale of substantially all of our 700 MHz spectrum, and \$81 million in other operating expenses related to a payment made to the Indian government in connection with the issuance of the BWA spectrum license.

- (1) Total reported device sales is the sum of all reported sales in U.S. dollars (as reported to us by our licensees) of all licensed CDMA-based, OFDMA-based and multimode CDMA/OFDMA subscriber devices (including handsets, modules, modem cards and other subscriber devices) by our licensees during a particular period (collectively "3G/4G devices"). The reported quarterly estimated ranges of average selling prices (ASPs) and unit shipments are determined based on the information as reported to us by our licensees during the relevant period and our own estimates of the selling prices and unit shipments for licensees that do not provide such information. Not all licensees report sales, selling prices and/or unit shipments the same way (e.g., some licensees report selling prices net of permitted deductions, such as transportation, insurance and packing costs, while other licensees report selling prices and then identify the amount of permitted deductions in their reports), and the way in which licensees report such information may change from time to time. Total reported device sales, estimated unit shipments and estimated ASPs for a particular period may include prior period activity that was not reported by the licensee until such particular period.
- (2) FY 2012 guidance for QSI and GAAP includes \$0.44 EPS related to a \$1.2 billion gain associated with the sale of substantially all of our 700 MHz spectrum, which was recognized in discontinued operations in Q2 FY12 and was excluded from Non-GAAP results.
- (3) The midpoints of the estimated calendar year ranges are identified for comparison purposes only and do not indicate a higher degree of confidence in the midpoints.

- (1) Non-GAAP reconciling items related to revenues consist primarily of other nonreportable segment revenues less intersegment eliminations. Non-GAAP reconciling items related to earnings before taxes consist primarily of certain costs of equipment and services revenues, research and development expenses, sales and marketing expenses, other operating expenses and certain investment income or losses and interest expense that are not allocated to the segments for management reporting purposes; nonreportable segment results; and the elimination of intersegment profit.
- (2) At fiscal year end, the sum of the quarterly tax provisions (benefits) for each column equals the annual tax provision (benefit) for each column computed in accordance with GAAP. In interim quarters, the sum of these provisions (benefits) may not equal the total GAAP tax provision, and starting in fiscal 2012, this difference is allocated to tax provisions (benefits) among the columns. In interim quarters of prior years, it was included in QSI because variability in QSI results was considered the primary driver of the difference.
- (3) In addition to our historical practice of excluding acquired in-process research and development expenses, starting with acquisitions completed in the third quarter of fiscal 2011, Non-GAAP results also exclude other items related to acquisitions. During fiscal 2012, acquisition-related items consisted of amortization of certain intangible assets.
- (4) During fiscal 2011, we shut down the FLO TV business and network. The results of FLO TV are presented as discontinued operations, and prior period amounts have been adjusted accordingly.

### **Note Regarding Use of Non-GAAP Financial Measures**

The Non-GAAP financial information presented herein should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. In addition, "Non-GAAP" is not a term defined by GAAP, and as a result, the Company's measure of Non-GAAP results might be different than similarly titled measures used by other companies. Reconciliations between GAAP and Non-GAAP results are presented herein.

The Company presents Non-GAAP financial information that is used by management (i) to evaluate, assess and benchmark the Company's operating results on a consistent and comparable basis; (ii) to measure the performance and efficiency of the Company's ongoing

core operating businesses, including the Qualcomm CDMA Technologies, Qualcomm Technology Licensing and Qualcomm Wireless & Internet segments; and (iii) to compare the performance and efficiency of these segments against each other and against competitors outside the Company. Non-GAAP measurements of the following financial data are used by the Company's management: revenues, R&D expenses, SG&A expenses, other operating expenses, operating income (loss), net investment income (loss), income (loss) before income taxes, effective tax rate, net income (loss), diluted earnings (loss) per share, operating cash flow and free cash flow. Management is able to assess what it believes is a more meaningful and comparable set of financial performance measures for the Company and its business segments by using Non-GAAP information. As a result, management compensation decisions and the review of executive compensation by the Compensation Committee of the Board of Directors focus primarily on Non-GAAP financial measures applicable to the Company and its business segments.

Non-GAAP information used by management excludes the QSI segment, certain share-based compensation, certain acquisition-related items and certain tax items. The QSI segment is excluded because the Company expects to exit its strategic investments at various times, and the effects of fluctuations in the value of such investments and realized gains or losses are viewed by management as unrelated to the Company's operational performance. Share-based compensation, other than amounts related to share-based awards granted under a bonus program that may result in the issuance of unrestricted shares of the Company's common stock, is excluded because management has concluded that such expenses should not be considered when assessing operational performance as they are deemed to be unrelated to the operating activities of the Company's ongoing core businesses. Further, share-based compensation is affected by factors that are subject to change, which may include the Company's stock price, stock market volatility, expected award life, risk-free interest rates and expected dividend payouts in future years. In addition to its historical practice of excluding acquired in-process research and development expenses from Non-GAAP results, the Company began excluding amortization of certain intangible assets, recognition of the step-up of inventories to fair value and the related tax effects of these items starting with acquisitions completed in the third quarter of fiscal 2011, as well as any tax effects of restructuring the ownership of such acquired assets. These certain acquisition-related items are excluded and no longer allocated to the Company's segments because management has concluded that such expenses should not be considered when assessing segment performance as they are deemed to

be unrelated to the operating activities of the Company's ongoing core businesses. In addition, these charges are significantly impacted by the size and timing of acquisitions, potentially obscuring period to period comparisons of the Company's operating businesses. Certain tax items that were recorded in each fiscal year presented, but that were unrelated to the fiscal year in which they were recorded, are excluded in order to provide a clearer understanding of the Company's ongoing Non-GAAP tax rate and after tax earnings. However, the Company excludes any benefit resulting from the retroactive extensions of the federal R&D tax credit from Non-GAAP results because the Company does not include the potential extension of the credit in its business outlook due to uncertainty as to whether and when the federal R&D tax credit will be retroactively extended.

The Company presents free cash flow, defined as net cash provided by operating activities less capital expenditures, to facilitate an understanding of the amount of cash flow generated that is available to grow its business and to create long-term stockholder value. The Company believes that this presentation is useful in evaluating its operating performance and financial strength. In addition, management uses this measure to evaluate the Company's performance, to value the Company and to compare its operating performance with other companies in the industry.

<sup>(</sup>a) At fiscal year end, the sum of the quarterly tax provisions (benefits) for each column equals the annual tax provision (benefit) for each column computed in accordance with GAAP. In interim quarters, the sum of these provisions (benefits) may not equal the total GAAP tax provision, and this difference is allocated to tax provisions (benefits) among the columns.
