# CollPlant to Present at the 2025 International Conference on Biofabrication

REHOVOT, Israel, Sept. 2, 2025 /PRNewswire/ -- *CollPlant Biotechnologies* (Nasdaq: CLGN), a regenerative and aesthetic medicine company developing disruptive technologies and products based on its non-animal-derived recombinant human collagen (rhCollagen), today announced its participation in the annual meeting of The International Society of Biofabrication: the International Conference on Biofabrication 2025, to be held September 14–17, 2025, at the Palace of Culture and Science in Warsaw, Poland.

---

CollPlant is scheduled to have two presentations at the Conference:

## **Tuesday, September 16<sup>th</sup>**

- Presentation title: "rhCollagen Bioinks for Biofabrication"
- Presentation time: This presentation will be made during the "Industrial Session" from 1:30 p.m. to 3:00 p.m.
- The session will be chaired by CollPlant's CEO, Yehiel Tal.

## **Wednesday, September 17<sup>th</sup>**

- Presentation title: "Mechanical Computational Modeling and Simulation of Biodegradable Implants"
- Presentation time: This presentation will be from 1:50 p.m. to 2:00 p.m.

Throughout the conference, CollPlant will host an exhibition booth featuring its rhCollagen platform and biofabrication applications. As 3D bioprinting gains momentum across medical research - enabling fabrication of complex scaffolds for tissue and organ engineering - CollPlant's rhCollagen-based bioinks offer the key attributes for high-fidelity printing: controlled rheology, a non-animal safety profile, biocompatibility, and tunable mechanical properties.

## **About the International Society for Biofabrication and its Annual Conference**

The International Society for Biofabrication (ISBF) is a non-profit scientific organization founded in 2010 that promotes advancements in biofabrication research, development, education, training, and clinical applications, including 3D printing of tissues and regenerative medicine. The ISBF hosts an annual [International Conference on Biofabrication](#), publishes the journal *Biofabrication*, and aims to foster collaboration and recognize excellence within the global biofabrication community.

The ISBF organizes the [International Conference on Biofabrication annually](#), to discuss research related to biofabrication and bioprinting and provide a platform for researchers and professionals to share findings and discuss future directions. Since the first meeting in 2006 in Manchester the conference has grown into an annual event with more than 500 participants from dozens of countries.

## **About CollPlant**

CollPlant is a regenerative and aesthetic medicine company ushering in a new era of medical solutions with a focus on 3D bioprinting of tissues and organs, tissue repair and medical aesthetics. The Company's products are based on its rhCollagen (recombinant human collagen) produced with CollPlant's proprietary plant-based genetic engineering technology. These products address indications within the diverse fields of tissue repair, aesthetics, and organ manufacturing.

In 2021, CollPlant entered into a development and global commercialization agreement for dermal and soft tissue fillers with Allergan, an AbbVie company, the global leader in the dermal filler market.

## **Forward-Looking Statements**

This press release may include forward-looking statements. Forward-looking statements may include, but are not limited to, statements relating to CollPlant's objectives plans and strategies, as well as statements, other than historical facts, that address activities, events or developments that CollPlant intends, expects, projects, believes or anticipates will or may occur in the future. These statements are often characterized by terminology such as "believes," "hopes," "may," "anticipates," "should," "intends," "plans," "will," "expects," "estimates," "projects," "positioned," "strategy" and similar expressions and are based on assumptions and assessments made in light of management's experience and perception of historical trends, current conditions, expected future developments and other factors believed to be appropriate.

Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements. Many factors could cause CollPlant's actual activities or results to differ materially from the activities and results anticipated in forward-looking statements, including, but not limited to, the following: the Company's history of significant losses, its need to raise additional capital and its inability to obtain additional capital on acceptable terms, or at all; the Company's expectations regarding the costs and timing of commencing and/or concluding pre-clinical and clinical trials with respect to breast implants, tissues and organs which are based on its rhCollagen based BioInk and other products for medical aesthetics, and specifically the Company's ability to initiate its next large-animal study for its breast implants in a timely manner, or at all; the Company's or its strategic partners' ability to obtain favorable pre-clinical and clinical trial results; regulatory action with respect to rhCollagen based bioink and medical aesthetics products or product candidates including, but not limited to acceptance of an application for marketing authorization review and approval of such application, and, if approved, the scope of the approved indication and labeling; commercial success and market acceptance of the

Company's rhCollagen based products, in 3D bioprinting and medical aesthetics; the Company's ability to establish sales and marketing capabilities or enter into agreements with third parties and its reliance on third party distributors and resellers; the Company's ability to establish and maintain strategic partnerships and other corporate collaborations, including its partnership with AbbVie and its ability to continue to receive milestone and royalties payments under the AbbVie agreement; the Company's reliance on third parties to conduct some or all aspects of its product development and manufacturing; the scope of protection the Company is able to establish and maintain for intellectual property rights and the Company's ability to operate its business without infringing the intellectual property rights of others; current or future unfavorable economic and market conditions and adverse developments with respect to financial institutions and associated liquidity risk; the impact of competition and new technologies; general market, political, and economic conditions in the countries in which the Company operates, including, with respect to the ongoing war in Israel, projected capital expenditures and liquidity, changes in the Company's strategy, and litigation and regulatory proceedings. More detailed information about the risks and uncertainties affecting CollPlant are contained under the heading "Risk Factors" included in CollPlant's most recent annual report on Form 20-F filed with the SEC, and in other filings that CollPlant has made and may make with the SEC in the future. The forward-looking statements contained in this press release are made as of the date of this press release and reflect CollPlant's current views with respect to future events, and CollPlant does not undertake and specifically disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
