Tecogen Announces Sale of Multi Unit Cogeneration System to Major Research University in Worcester, MA

WALTHAM, Mass., Jan. 29, 2015 /PRNewswire/ -- Tecogen[®] Inc. (NASDAQ: TGEN) today announced the sale and posted a [video](#) on the Company's website describing the design, installation, commissioning and maintenance program of two Tecogen Ultra CM-75[®] combined heat and power (CHP) units at Worcester Polytechnic Institute's (WPI) Gateway and Life Sciences Building and Campus Center.

The video features Bill Spratt, WPI's Director of Facilities and Operations describing the project. The two Tecogen systems are generating power and heat that offsets 30% of the building's energy use, significantly reducing greenhouse emissions and cutting criteria pollutants, the compounds contributing to smog.

The Tecogen system in the Gateway and Life Sciences Building is also controlling ambient temperature and humidity. The video featuring the Tecogen system is available to view on the Tecogen website video page (<http://www.tecogen.com/resources-videos.htm>).

"Substantial cost savings, reduction in greenhouse gas emissions and criteria pollutants as well as Tecogen's ability to provide all services from design to maintenance makes it easy for customers such as universities and colleges to choose Tecogen," said Robert Panora, President and COO of Tecogen.

Worcester Polytechnic Institute is a private research university located in Worcester, Massachusetts.

About Tecogen

Tecogen manufactures, installs, and maintains high efficiency, ultra-clean combined heat and power products including natural gas engine-driven cogeneration, air conditioning systems, and high-efficiency water heaters for industrial and commercial use. Tecogen has shipped more than 2,000 units, supported by an established network of engineering, sales, and service personnel across the United States.
