Tecogen Receives Tecochill Order for Arizona Cultivation Facility

WALTHAM, MA, July 12, 2022 (GLOBE NEWSWIRE) -- via [NewMediaWire -- Tecogen Inc.](#) (OTCQX: TGEN), a clean energy company providing ultra-efficient and clean on-site power, heating, and cooling equipment, is pleased to announce the sale of a 400-ton Tecochill chiller to an indoor cultivation facility being built in Arizona. The chiller will provide cooling for the facility using inexpensive natural gas, with the free waste heat utilized for dehumidification. A maintenance contract is expected to be executed once the units are installed later this year and will be serviced out of Tecogen's West Coast factory service center.

Many gas companies provide discounted gas to customers that meet certain standards for operation. In this case, Southwest Gas is providing a 25% discount on gas delivery for use in the Tecochill system, further reducing the cost of operating the Tecochill system.

"Indoor cultivation facilities continue to be a strong market for our chillers," noted Benjamin Locke, Tecogen's CEO. "As the rapid growth of these facilities continues, the importance of operational cost savings becomes more important. The Tecochill solution provides significant cost savings compared to traditional methods of facility cooling and dehumidification. We anticipate continued sales for indoor cultivation throughout 2022."

About Tecogen

[Tecogen Inc.](#) designs, manufactures, installs, and maintains high efficiency and ultra-clean cogeneration products, including combined heat and power systems, air conditioning systems, and high-efficiency water heaters for residential, commercial, recreational, and industrial applications. The company's cost efficient, reliable, and environmentally friendly products for energy production nearly eliminate criteria pollutants and significantly reduce customers' carbon footprint.

In business for over 35 years, Tecogen has shipped more than 3,000 units, supported by an established network of engineering, sales, and service personnel throughout North America. Aggregate run hours on Tecogen's InVerde cogeneration systems exceeds 5 million hours. For more information, please visit www.tecogen.com or contact us for a free [Site Assessment](#).
