About CohBar

CohBar (OTCQX: CWBR and TSXV: COB.U) is a leader in the research and development of mitochondria-based therapeutics, an emerging class of drugs for the treatment of diseases associated with aging. MBTs originate from the discovery of a novel group of peptides within the genome of mitochondria, the powerhouses of the cell. This groundbreaking discovery was made by our founders, world leaders in the biology of aging, metabolism and mitochondrial genomics. MBTs offer the potential to address a broad range of diseases such as type 2 diabetes, cancer, atherosclerosis and neurodegenerative disorders.
