CohBar Announces Closing of Public Offering of Common Stock and Warrants

MENLO PARK, Calif., Aug. 28, 2020 (GLOBE NEWSWIRE) -- CohBar, Inc. (NASDAQ: CWBR) (the "Company"), a clinical stage biotechnology company developing mitochondria based therapeutics to treat chronic diseases and extend healthy lifespan, today announced the closing of its previously announced underwritten public offering of 12,300,000 units at a price to the public of \$1.22 per unit. Each unit consists of one share of the Company's common stock and one warrant to purchase 0.75 of a share of common stock at a per share exercise price of \$1.44. In addition, the underwriters partially exercised the over-allotment option for warrants to purchase an additional 1,383,750 shares. The warrants are exercisable for five years from the closing date of the offering. The aggregate gross proceeds from this offering were approximately \$15.0 million, before deducting underwriting discounts and commissions and estimated offering expenses.

Roth Capital Partners acted as sole book-running manager for the offering and Brookline Capital Markets, a division of Arcadia Securities, LLC, and WBB Securities acted as co-managers.

The securities were issued pursuant to an effective shelf registration statement filed with the Securities and Exchange Commission (SEC) on November 22, 2017. A final prospectus supplement and accompanying prospectus relating to the offering were filed with the SEC and are available on the SEC's website at www.sec.gov. Copies of the prospectus supplement, together with the accompanying prospectus, can be obtained at the SEC's website at www.sec.gov or from Roth Capital Partners, 888 San Clemente, Newport Beach, CA 92660, Attn: Prospectus Department, telephone: 800-678-9147.

This press release does not and shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of these securities in any state or other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or other jurisdiction.

About CohBar

CohBar (NASDAQ: CWBR) is a clinical stage biotechnology company focused on the research and development of mitochondria based therapeutics, an emerging class of drugs for the treatment of chronic and age-related diseases. Mitochondria based therapeutics originate from the discovery by CohBar's founders of a novel group of naturally occurring peptide sequences within the mitochondrial genome, some of which have been shown to have the potential to regulate key processes in multiple systems and organs in the body. To date, the company has discovered more than 100 mitochondrial derived peptides and generated over 1,000 analogs. CohBar's efforts focus on the development of these peptides into therapeutics that offer the potential to address a broad range of diseases because of the

underlying impact of mitochondrial dysfunction. The company's lead compound, CB4211, is in the Phase 1b stage of a Phase 1a/1b clinical trial for NASH and obesity. In addition, CohBar currently has four preclinical programs: CB5138 Analogs for fibrotic diseases, CB5064 Analogs for COVID-19 associated ARDS and type 2 diabetes, MBT5 Analogs for CXCR4-related cancer and orphan diseases, and MBT3 Analogs for cancer immunotherapy.
