The audio recording will also be available at www.cohbar.com during the same period.

About CohBar

CohBar (NASDAQ: CWBR) is a clinical-stage biotechnology company leveraging the power of the mitochondria and the peptides encoded in its genome to develop potential

breakthrough therapeutics targeting chronic and age-related diseases with limited to no treatment options. CohBar has assembled a leading position in exploring the mitochondrial genome and its utility for the development of novel therapeutics, including world-renowned expertise in mitochondrial biology, a broad intellectual property estate, key opinion leaders and disciplined drug discovery and development processes. CohBar is utilizing its Mito+ platform to identify and develop modified versions of natural peptides called analogs to treat a variety of serious conditions, with a focus on diseases involving inflammation and fibrosis. CohBar is planning to file an IND for its second clinical candidate CB5138-3 in the second half of 2023, with an initial indication of idiopathic pulmonary fibrosis. The company has previously demonstrated clinical proof of concept for its approach with the positive topline data from its CB4211 product candidate being developed for NASH and obesity.
