Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of **Athene Annuity and Life Company** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Iowa.

The Insurance Division, Department of Commerce, of the State of Iowa (the Division) recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Iowa Insurance Law. The NAIC's *Accounting Practices & Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Iowa. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

Among the products issued by the Company are indexed universal life insurance and indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, such as the Standard & Poor's 500 Composite Stock Price Index. Call options, futures, variance swaps and total return swaps are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. In 2006, the Commissioner of the Division issued Bulletin 06-01*, Accounting for Derivative Instruments Used to Hedge the Growth in Interest Credited for Index Products*, which prescribes that an insurer may elect to recognize changes in the fair value of derivative instruments purchased to hedge indexed products in the statement of operations. The Company has elected to apply Bulletin 06-01 to its futures, variance swaps and total return swaps. Application of Bulletin 06-01 does not impact the Company's statutory surplus amounts.

In 2009, the Commissioner of the Division promulgated Iowa Administrative Code (IAC) Section 191-97, *Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve*, which prescribes that an insurer may elect (i) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (ii) to utilize an indexed annuity reserve calculation methodology under which call options associated with the current index interest crediting term are valued at zero. IAC Section 191-97 does not apply to products that do not guarantee a minimum interest accumulation, such as our variable and index-linked deferred annuities. The Company has elected to apply IAC Section 191-97 to its eligible over the counter (OTC) call options and reserve liabilities.

The NAIC requires annuities issued by life insurance companies on or after January 1, 2015, to use the 2012 Individual Annuity Reserving (IAR) Mortality Table. In 2015, the Division promulgated IAC Section 191-43.3(5), which set an elective alternative effective date of January 1, 2016 for adoption of the 2012 IAR Mortality Table. The Company chose to use the Annuity 2000 Mortality Table for all annuities issued in 2015.

A reconciliation of the Company's net income and statutory surplus between practices prescribed or permitted by the State of Iowa and NAIC SAP is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from the estimates used in preparing the financial statements.

C. Accounting Policy

(1) Short-term investments - No Significant Changes

(2) Bonds which qualify as issuer credit obligations are stated at amortized cost or fair value based on their rating by the NAIC. Bonds held at amortized cost are amortized using the scientific interest method on a yield-to-worst basis. Debt securities that do not qualify as bonds under the principles-based bond definition are reported at the lower of amortized cost or fair value. For these debt securities, the calculation of amortized cost and the determination and recognition of other-than-temporary impairment follow the policies for asset-backed securities.

(3) Common stocks - No Significant Changes

(4) Preferred stocks - No Significant Changes

(5) Mortgage loans - No Significant Changes

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

(6) Bonds which qualify as asset-backed securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other-than-temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Asset-backed securities stated at amortized cost are amortized or accreted using the scientific interest method. Residual interests in securitization vehicles that do not qualify as bonds are initially reported at cost. Subsequently, they are reported using the calculated practical expedient method, where the book/adjusted carrying value is reduced by distributions received until the residual interests have a book or adjusted carrying value of zero. Any distribution received thereafter is recognized as interest income.

(7) Investments in subsidiaries, controlled and affiliated entities - No Significant Changes

(8) Investments in joint ventures, partnerships and limited liability entities - No Significant Changes

(9) Derivatives - No Significant Changes

(10) Investment income as a factor in the premium deficiency calculation - No Significant Changes

(11) Liabilities for losses and loss/claim adjustment expenses - No Significant Changes

(12) Changes in capitalization policy - No Significant Changes

(13) Pharmaceutical rebate receivables - No Significant Changes

D. Going Concern

Management's assessment of the relevant conditions through August 14, 2025 does not give rise to substantial doubt of the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Effective January 1, 2025, the Company adopted the principle-based-bond definition (PBBD). This adoption clarifies that securities qualifying as issuer credit obligations fall under the scope of SSAP No. 26, *Bonds*, while those qualifying as asset-backed securities fall under SSAP No. 43, *Asset-Backed Securities*. Securities that do not meet these criteria are reported as debt securities that do not qualify as bonds, residual tranches, other invested assets, or non-admitted assets.

Changes in measurement due to the transition is reported as a change in unrealized gains (losses) and not as a change in accounting principle. The impacts of securities reclassified under the PBBD are as follows:

- As of January 1, 2025, the aggregate book adjusted carrying value prior to adoption of PBBD for all securities reclassified from Schedule D, part 1 to Schedule BA is $1,648.5 million in the general account and $229.0 million in the separate accounts.
- As of January 1, 2025, the aggregate book adjusted carrying value after adoption of PBBD for securities reclassified from Schedule D, part 1 to Schedule BA that resulted in a change in measurement basis from amortized cost to lower of amortized cost or fair value is $872.1 million in the general account and $127.7 million in the separate accounts.
- The aggregate surplus impact for securities reclassified from Schedule D, part 1 to Schedule BA includes the difference between the book adjusted carrying value as of December 31, 2024 and the book adjusted carrying value after adoption as of January 1, 2025 for those securities that resulted in a change in measurement basis. The total surplus impact from the change in measurement basis was not material.
- Contemporaneous with the January 1, 2025 adoption of the PBBD, the Company made conforming revisions for INT 24-01: *Principles-Based Bond Definition Implementation Questions and Answers*, which provided further clarification on the accounting for hybrid instruments, among other topics. Pursuant to this guidance, the Company reclassified certain hybrid instruments from Schedule D, part 2, section 1 to Schedule BA. The corresponding impact to surplus was not material.

During 2025, the Company discovered an error which resulted in a $13.4 million overstatement of commissions and expense allowances on reinsurance ceded in the separate account prior period financial statements. In accordance with SSAP No. 3, *Accounting Changes and Correction of Errors*, the correction was recorded directly to surplus in the separate account. The Company also discovered an error in 2025 which resulted in a $9.3 million understatement of asset valuation reserve (AVR) and a corresponding overstatement of surplus in the prior period financial statements. In accordance with SSAP No. 3, *Accounting Changes and Correction of Errors*, the change in AVR correction was recorded directly to surplus. The net impact of these corrections decreased surplus on the general account by a total of $22.7 million, representing 0.6% of ending capital and surplus as of June 30, 2025 and December 31, 2024.

3. Business Combinations and Goodwill

A. Statutory Purchase Method - None

B. Statutory Merger

On December 20, 2023, the Company and Athene Annuity & Life Assurance Company (AADE), its Delaware domiciled parent company, executed an Agreement and Plan of Merger. Effective October 11, 2024, following the receipt of all required regulatory approvals, AADE (NAIC #61492) merged with and into the Company, with the Company as the surviving entity. The Company received a no objection letter from the Division to use a merger effective date of October 1, 2024 for financial reporting purposes.

The merger was accounted for in accordance with SSAP No. 68, *Business Combinations and Goodwill*, as a statutory merger. As such, financial statements for periods prior to the merger were combined and the recorded assets, liabilities and surplus of the Company and AADE were carried forward to the merged company. The common capital stock of AADE was deemed canceled and AADE's investment in the affiliated common stock of AAIA was eliminated. The business the Company previously ceded to AADE under a coinsurance agreement is no longer reflected as assumed and ceded risks in the restated merged financial statements.

(4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

The following table shows the gross unrealized losses and fair values of asset-backed securities, which have not been impaired to fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position as of June 30, 2025:

a. The aggregate amount of unrealized losses:
   1. Less than 12 months $ 188,034,355
   2. 12 months or longer 773,727,211
b. The aggregate related fair value of securities with unrealized losses:
   1. Less than 12 months $ 18,186,172,104
   2. 12 months or longer 8,587,398,469

(5) A full analysis of all relevant qualitative considerations was completed in reaching the conclusion that the impairments were not other-than-temporary, including the intent and ability to hold the investment for a period of time sufficient to allow for a recovery in value. Specific events that may influence the operations of the issuer and impaired earnings potential are reviewed in addition to length of time and extent to which the fair value has been less than cost.

(1) Information regarding the company policy or strategies for engaging in repo programs, policy for requiring collateral

Included in short-term investments are amounts receivable under reverse repurchase agreements, which involves the purchase of investments from a seller with the agreement that the investments will be repurchased by the seller at a specified price, and at a specified date or within a specified period of time, not to exceed 364 days. The investments purchased, which represent collateral on a secured lending arrangement, are not reflected in the Company's consolidated balance sheets. A. Liquidity Facility—On June 27, 2025, Athene Holding Ltd., Athene Annuity Re Ltd. (AARe), Athene Life Re Ltd. and the Company entered into a revolving credit agreement with a syndicate of banks and Wells Fargo Bank, National Association, as administrative agent (Liquidity Facility). The Liquidity Facility is unsecured and has a commitment termination date of June 26, 2026, subject to any extensions of additional 364-day periods with consent of extending lenders and/or "term-out" of outstanding loans (by which, at our election, the outstanding loans may be converted to term loans which shall have a maturity of up to one year after the original maturity date), in each case in accordance with the terms of the Liquidity Facility. In connection with the Liquidity Facility, AARe guaranteed all of the obligations of each other borrower under the Liquidity Facility and the related loan documents. The Liquidity Facility will be used for liquidity and working capital needs to meet short-term cash flow and investment timing differences. The borrowing capacity under the Liquidity Facility is $2.6 billion, subject to being increased up to $3.1 billion in total on the terms described in the Liquidity Facility. The Liquidity Facility contains various standard covenants with which we must comply, including the following:

1. AARe minimum consolidated net worth of no less than $23.2 billion; and
2. Restrictions on our ability to incur liens, with certain exceptions.

Interest accrues on outstanding borrowings at either the adjusted term secured overnight financing rate plus a margin or the base rate plus a margin, with applicable margin varying based on AARe's financial strength rating. Rates and terms are as defined in the Liquidity Facility.

As of June 30, 2025, the Company had no amounts outstanding under the Liquidity Facility and was in compliance with all financial covenants under the facility.

B. FHLB (Federal Home Loan Bank) Agreements

(1) The Company is a member of the FHLB of Des Moines. Through its membership, the Company is eligible to borrow under fixed or floating rate short-term arrangements to provide additional liquidity. These borrowings are accounted for as borrowed money under SSAP No. 15, *Debt and Holding Company Obligations.* The Company did not have any outstanding borrowings as of June 30, 2025 or December 31, 2024.

The Company has issued general and separate account funding agreements to the FHLB of Des Moines in exchange for cash resulting in a liability of $20,706.0 million as of June 30, 2025. The Company uses these funds in an investment spread strategy, consistent with its other investment spread operations. As such, the Company applies SSAP No. 52, *Deposit-Type Contracts,* accounting treatment to these funds, consistent with its other deposit-type contracts. It is not part of the Company's strategy to utilize these funds for operations, and any funds obtained from the FHLB of Des Moines for use in general operations would be accounted for consistent with SSAP No. 15 as borrowed money.

The Company must provide appropriate collateral to borrow under the arrangements described above. The borrowing capacity available to the Company under these agreements is largely a factor of the Company's ability to post eligible collateral, as well as internal limits such as single-holder exposure limits (10% of the entity's balance sheet liabilities) and NAIC capital requirements.

The tables below indicate the amount of FHLB of Des Moines stock purchased, collateral pledged, assets and liabilities related to the agreements with FHLB of Des Moines.

(1) Guaranty associations may subject member insurers, including the Company, to assessments that require the insurers to pay funds to cover contractual obligations under insurance policies issued by insurance companies that become impaired or insolvent. The assessments are based on an insurer's proportionate share of premiums written in that state during a specified one-year or three-year period for lines of business in which the impaired or insolvent insurer engaged, subject to prescribed limits. On December 30, 2022, the North Carolina Wake County Superior Court entered an Order of Liquidation (Liquidation Order) against Bankers Life Insurance Company (BLIC) and Colorado Bankers Life Insurance Company (CBLIC), which was affirmed by the North Carolina Court of Appeals on March 5, 2024. On April 9, 2024, GBIG Holdings, LLC (GBIG), the sole shareholder of BLIC and CBLIC, filed a Petition for Discretionary Review requesting the North Carolina Supreme Court review the decision by the North Carolina Court of Appeals to affirm the Liquidation Order. On July 11, 2024, GBIG filed a Motion to Withdraw its Petition for Discretionary Review. The Company is not a party to this litigation. The North Carolina Supreme Court granted the Motion to Withdraw on August 23, 2024, which made the Liquidation Order effective on November 30, 2024. Shortly thereafter, guaranty associations began levying assessments, with assessments expected to continue for the foreseeable future. As of June 30, 2025, the Company recorded a liability of $11.2 million based on the current best estimate of future assessments expected, as well as an asset of $11.1 million for future premium tax credits. The actual amount of assessments levied against the Company in connection with the BLIC and CBLIC insolvencies may vary from this estimate.

Fiduciary or Best Interest Standards - On February 13, 2020, the NAIC adopted the Suitability in Annuity Transactions Model Regulation (SAT), which places responsibilities upon issuing insurance companies with respect to the suitability of annuity sales, including responsibilities for training agents. In addition the SAT incorporates a "best interest" or similar standard with respect to the suitability of annuity sales. A producer is considered to have acted in the best interest of the customer if they have satisfied certain prescribed obligations regarding care, disclosure, conflict of interest and documentation. State adoption of these revisions, and any future changes in such laws and regulations, may impact the way our US insurance subsidiaries market and sell their annuity products. Forty-eight states, including Iowa, have adopted the amended SAT that includes a best interest standard. On July 22, 2018, separate and apart from the NAIC, the NYDFS issued amendments to its SAT regulation to incorporate a "best interest" standard with respect to the suitability of life insurance and annuity sales. The amendments made by NYDFS are currently the subject of litigation. Future changes in such laws and regulations, including those that impose a "best interest" standard, may impact the way the Company and its subsidiaries market and sell annuity products.

Since 2016, the DOL has issued various regulations expanding the definition of "investment advice" and broadening the circumstances under which distributors and manufacturers of insurance and annuity products could be considered "fiduciaries" and subject to certain standards in providing advice. On December 15, 2020, the DOL issued regulatory action to reinstate the pre-2016 regulatory definition of fiduciary advice. In the preamble to Prohibited Transaction Exemption (PTE) 2020-02, however, the DOL announced a new interpretation of parts of the regulation that broadens the circumstances under which producers, including insurance producers, could be considered fiduciaries under ERISA in connection with recommendations to "rollover" assets from a qualified retirement plan to an IRA or from an IRA to another IRA. For this purpose, "IRA" includes individual retirement annuities. This guidance reverses an earlier DOL interpretation suggesting that rollover advice by someone who was not already a fiduciary to a plan did not constitute investment advice giving rise to a fiduciary relationship. In connection with the broadened application of the fiduciary definition, the DOL's PTE 2020-02 allows fiduciaries to receive compensation in connection with providing investment advice, including advice about rollovers, that would otherwise be prohibited as a result of their fiduciary relationship to the ERISA Plan, a participant in the ERISA Plan, or an IRA owner. On April 23, 2024, the Department of Labor published the final version of the fiduciary rule and certain prohibited transaction exemptions, including PTE 84-24 and PTE 2020-02. The effective date of September 23, 2024, is currently on hold due to legal challenges. Two federal district courts in Texas issued stays on the implementation and the DOL filed an appeal to these decisions. We are currently monitoring the situation and unable to evaluate any potential business impact until the legal challenges are resolved.

In addition to the matters previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

Estimates of possible losses or ranges of losses for particular matters cannot, in the ordinary course, be made with a reasonable degree of certainty. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially adversely affected by an ultimate unfavorable resolution of pending litigation and regulatory matters.

Transfers into and out of Level 3 represent securities carried at lower of cost or fair value resulting in periodic transfers into and out of Level 3 Financial instruments which are characterized as carried at fair value. Transfers into and out of Level 3 may also occur due to changes in valuation sources, or changes in the availability of market observable inputs.

(3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs.

(4) The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vendor prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

- Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

  Level 2 inputs include the following:
  1. Quoted prices for similar assets or liabilities in active markets,
  2. Observable inputs other than quoted market prices, and
  3. Observable inputs derived principally from market data through correlation or other means.

- Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Assets and liabilities are valued as discussed below in part C.

(5) See parts (1) through (4) above.

Bonds, cash equivalents and short-term investments – The Company obtains the fair value for most marketable, public securities without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value public security with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3. The Company values privately placed securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed securities are classified as Level 2 or 3.

Preferred stocks and common stocks unaffiliated – The Company values equity securities traded on an exchange as Level 1. Private equities or equity securities not traded on an exchange and are priced by a commercial pricing service are classified as Level 2, and the securities priced by an internal model are classified as Level 3. In addition, unaffiliated common stocks include FHLB stock, which is carried at fair value, which is presumed to be par because it can only be redeemed by the bank and is classified as Level 2.

Mortgage loans – The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans – The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contracts.

Derivatives (including separate account group annuity and index-linked products) – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade are in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

Other invested assets – Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. These investments are reported in the Net Asset Value column. Other than partnerships, other invested assets may include surplus notes and other investments with bond or stock characteristics and the Company attempts to value these using several commercial pricing services, which would be classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (variable products) – Separate account assets classified as Level 2 are valued based on the fair value of the underlying funds. Financial instruments within these separate accounts included in the NAV column are valued using the same fair value assumptions and methods utilized for other invested assets in the general account. Fair values and changes in the fair values of the underlying funds accrue directly to the policy owners and are not included in the Company's revenues and expenses or surplus.

Separate account assets (group annuity and index-linked products) – Financial instruments within these separate accounts classified as Level 2 and 3 or included in the NAV column are valued using the same fair value assumptions and methods utilized in the general account.

Repurchase agreements - The carrying value of the repurchase agreements liability approximates fair value and is reported as level 2.

Deposit-type contracts (including separate account group annuity and funding agreements) – Deposit-type contracts classified as Level 3 include single premium immediate annuities (SPIA) and supplemental contracts. Fair value of SPIA and supplemental contracts are calculated by discounting best estimate cash flows based on market interest rate assumptions. Fair value of funding agreements and guaranteed interest contracts are calculated by discounting future cash flows using market rates on the valuation date, and are classified as Level 2.

D. Not Practicable to Estimate Fair Value - None

E. Nature and Risk of Investments Reported at NAV

The Company invests in certain non-fixed income, alternative investments in the form of limited partnerships (investment funds) which are reported at NAV. Adjustments to the carrying amount reflect the Company's pro rata ownership percentage of the operating results as indicated by NAV in the investment fund financial statements. The NAV from the investment fund financial statements can be on a lag of up to three months when investee information is not received in a timely manner. These investments are listed in the NAV column of the fair value tables above as this is the primary method for reporting fair value for these investments.

As of June 30, 2025, the Company's general and separate accounts have $5,479.2 million unfunded commitments to invest in these investment funds. See Note 6 for additional details on the Company's reporting of unfunded commitments.
