NeoGenomics Announces that Natera Has Voluntarily Withdrawn its Appeal in Ongoing RaDaR Patent Litigation

NeoGenomics moving toward a full U.S. clinical launch of its RaDaR ST molecular residual disease (MRD) assay in Q1 2026

FORT MYERS, Fla.--(BUSINESS WIRE)-- [NeoGenomics, Inc.](#) (NASDAQ:NEO), a leading provider of oncology diagnostic solutions that enable precision medicine, today announced that Natera voluntarily dismissed its appeal (and NeoGenomics thus dismissed its cross-appeal) of the North Carolina District Court's August 2025 ruling. The dismissal will leave in place the ruling in NeoGenomics' favor.

That ruling, issued by the District Court for the Middle District of North Carolina, granted NeoGenomics' motion for summary judgment and held that Natera's asserted patent claims are invalid for claiming ineligible subject matter. The Court dismissed Natera's claims against NeoGenomics with prejudice and entered a declaratory judgment of invalidity with respect to both of Natera's asserted patents.

"We are very pleased that Natera has voluntarily decided to end this litigation process," said Tony Zook, CEO of NeoGenomics. "While we were confident in our position, this latest development nonetheless allows us to focus our full attention on executing a robust clinical launch of RaDaR ST in the first quarter of next year."

About NeoGenomics

NeoGenomics, Inc. is a premier cancer diagnostics company specializing in cancer genetics testing and information services. We offer one of the most comprehensive oncology-focused testing menus across the cancer continuum, serving oncologists, pathologists, hospital systems, academic centers, and pharmaceutical firms with innovative diagnostic and predictive testing to help them diagnose and treat cancer. Headquartered in Fort Myers, FL, NeoGenomics operates a network of CAP-accredited and CLIA-certified laboratories for full-service sample processing and analysis services throughout the US and a CAP-accredited full-service sample-processing laboratory in Cambridge, United Kingdom.

Forward Looking Statements

This press release includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as "anticipate," "expect," "plan," "can," "could," "would," "may," "will," "believe," "estimate," "forecast," "goal," "project," "guidance," "potential" and other words of similar meaning, although not all forward-looking statements include these words. These forward-looking statements include statements regarding the

Company's plans to launch its RaDaR ST molecular residual disease assay in the first quarter of 2026. Each forward-looking statement contained in this press release is subject to a number of risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Applicable risks and uncertainties include, among others, the risks identified under the heading "Risk Factors" contained in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and the Company's other filings with the Securities and Exchange Commission.

We caution investors not to place undue reliance on the forward-looking statements contained in this press release. You are encouraged to read our filings with the SEC, available at www.sec.gov and in the "Investors" section of our website at ir.neogenomics.com, for a discussion of these and other risks and uncertainties. The forward-looking statements in this press release speak only as of the date of this document (unless another date is indicated), and we undertake no obligation to update or revise any of these statements. Our business is subject to substantial risks and uncertainties, including those referenced above. Investors, potential investors, and others should give careful consideration to these risks and uncertainties.
