ISA's Duos Technologies Releases Third Generation Platform

Innovative Technology Delivers Comprehensive Solution for Security and Enterprise Management; Ability to Offer as a SaaS Model

JACKSONVILLE, FL / ACCESSWIRE / May 21, 2015 /Information Systems Associates Inc.'s (OTC Markets: IOSA) wholly-owned subsidiary Duos Technologies ("duostech"), a provider of intelligent security analytical technology solutions, announces release of centraco 3.0, a powerful enterprise level software management platform which incorporates the traditional "Physical Security Information Management" ("PSIM") functionality with a comprehensive Enterprise Information System ("EIS") software suite.

Centraco 3.0 intelligently connects information from a virtually unlimited number of connected devices, sub systems and data streams into a single central command and control user interface. Centraco 3.0 substantially exceeds the capabilities of conventional command and control platforms as it natively embeds all of Duos Technologies' proprietary intelligent security analytical technology solutions and provides an open architecture that allows integration of an unlimited number of third party technologies.

Scalability of this 3D generation PSIM/EIS software suite is unlimited as it is built as a web browser application using the latest web technologies, including HTML5, WebSocket, WebRTC and WebGL. "No longer does the IT department have to deploy a large application to each of their end-users' computers. With centraco 3.0 all the end-user has to do is open his favorite web browser on a desktop, phone or tablet, type in a url and start using the system. User authentication and all content, including live and archived video, is delivered securely over HTTPS," said David Ponevac, ISA Duos Technologies' Executive VP and CTO. "We have built a full-featured enterprise management system with an extensive integrated alarm reporting engine, that pushes notifications and has 3D mapping capabilities inside a stock web browser. We feel confident our customers will fall in love with centraco's interface and the rich feature set it offers," added Mr. Ponevac.

Gianni Arcaini, Chairman and CEO of ISA Duos Technologies, stated, "This modular state-of-the-art intelligent command control platform is unique in the market place. It is extensively used for our connected intelligent solutions today, and we intend to launch the delivery of centraco 3.0 through comprehensive partnering arrangements, both as a licensed product as well as under a Software-as-a-Service ("SaaS") model, which is the future of the global software industry." The digital delivery as a SaaS model provides a myriad of advantages to the end user as it is very much comparable to cable TV subscriptions, whereby the user pays a monthly subscription fee and the software is centrally managed and periodically updated. Under this model, users no longer have to maintain and track software updates and upgrades as this function will be performed automatically by the Company.

About Information Systems Associates Inc./Duos Technologies Inc.

Information Systems Associates Inc. (OTC Markets: IOSA), based in Jacksonville, FL, provides intelligent security analytical technology solutions with a strong portfolio of intellectual property. Its Duos Technologies' core competencies include advanced intelligent technologies that are delivered through its proprietary integrated enterprise command and control platform, centraco™. The Company provides its broad range of technology solutions with an emphasis on mission critical security, inspection and operations within the rail, utilities, petrochemical, healthcare, and hospitality sectors. ISA also offers IT, professional services and consulting services for information technology projects.

Forward-Looking Statements

This press release contains forward-looking statements that involve substantial uncertainties and risks. These forward-looking statements are based upon our current expectations, estimates and projections and reflect our beliefs and assumptions based upon information available to us at the date of this release. We caution readers that forward-looking statements are predictions based on our current expectations about future events. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Our actual results, performance or achievements could differ materially from those expressed or implied by the forward-looking statements as a result of a number of factors, including but not limited to, the technical capabilities of our centraco 3.0 command control platform to work with end users' applications and the market acceptance of the platform, competing control platform, our ability to enter into partnering or teaming arrangements relating to the centraco platform, our ability to tap into the relevant potential markets, the sufficiency and availability of working capital and general changes in economic conditions. Further information on our risk factors is contained in our filings with the SEC, including the Form 10-K for the year ended December 31, 2014. Any forward-looking statement made by us herein speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to revise or update any forward-looking statement for any reason.
