TeraWulf Reports Second Quarter 2024 Financial Results

Q2 2024 Revenue of \$35.6 million, gross profit (exclusive of depreciation) of \$21.7 million and Non-GAAP Adjusted EBITDA of \$19.5 million.

Revenue growth of 130.2% year-over-year for the three-month period ended June 30, 2024.

Paid down approximately \$30.2 million of debt in Q2 2024, followed by a significant repayment of \$75.8 million in July 2024, fully eliminating the Company's debt ahead of maturity.

Operational self-mining capacity as of June 30, 2024 increased 80% year-over-year to 8.8 EH/s.

Continued advancements in AI and high-performance computing initiatives at Lake Mariner.

EASTON, Md., Aug. 12, 2024 (GLOBE NEWSWIRE) -- TeraWulf Inc. (Nasdaq: WULF) ("TeraWulf" or the "Company"), which owns and operates vertically integrated, domestic bitcoin mining facilities powered by approximately 95% zero-carbon energy, today announced its unaudited interim financial results for the second quarter of fiscal year 2024 and provided an operational update.

Second Quarter 2024 GAAP Operational and Financial Highlights

- Self-mined 539 bitcoin at the Lake Mariner Facility.
- Revenue increased to \$35.6 million in Q2 2024 compared to \$15.5 million in Q2 2023.
- Gross profit (exclusive of depreciation) increased to \$21.7 million in Q2 2024 compared to \$10.3 million in Q2 2023.
- Total self-mining hashrate capacity at the Lake Mariner Facility of 8.8 EH/s as of June 30, 2024, representing an increase of 79.6% relative to the same prior year period.

Key GAAP Metrics (\$ in thousands)	Three Months Ended Q2 2024	Three Months Ended Q2 2023	% Change
Revenue	\$ 35,574	\$ 15,456	130.2%
Gross profit (exclusive of depreciation)	\$ 21,656	\$ 10,343	109.4%
Gross profit margin	60.9%	66.9%	(9.0)%

Second Quarter 2024 Non-GAAP Operational and Financial Highlights

- Self-mined 699 bitcoin across the Lake Mariner and Nautilus Cryptomine facilities, which represented a 21.4% decrease relative to in Q2 2023.

- Total value of bitcoin self-mined¹ of \$46.1 million in Q2 2024 compared to \$24.9 million in Q2 2023.
- Power cost per bitcoin self-mined increased year-over-year, to \$22,954 per bitcoin in Q2 2024 from \$6,688 per bitcoin in Q2 2023, due to an approximate doubling in network difficulty and the bitcoin reward halving in April 2024.
- Adjusted EBITDA of \$19.5 million in Q2 2024, an increase of 156.4% from \$7.6 million in Q2 2023.

Key Non-GAAP Metrics²	Three Months Ended Q2 2024	Three Months Ended Q2 2023	% Change
Bitcoin Self-Mined ³	699	889	(21.4)%
Value per Bitcoin Self-Mined ⁴	\$ 65,984	\$ 27,976	135.9%
Power Cost per Bitcoin Self-Mined ⁵	\$ 22,954	\$ 6,688	243.2%
Avg. Operating Hash Rate (EH/s) ⁶	7.4	3.6	105.6%

Management Commentary

“TeraWulf’s second-quarter results reflect our unwavering commitment to operational excellence and strategic growth. By completing the construction of Building 4 at Lake Mariner, advancing our AI and high-performance computing initiatives, and streamlining our capital structure, we have solidified our position as a leader in the industry. Our focus on low-cost, predominantly zero-carbon energy and efficient management has enabled us to achieve industry-leading profitability while positioning us to capitalize on emerging opportunities in the rapidly growing data center market,” said Paul Prager, CEO of TeraWulf.

“Our extensive 600 megawatts of owned and scalable infrastructure is a key differentiator, allowing us to leverage our success in bitcoin mining as the foundation for expanding into alternative compute hosting. This strategic move aligns perfectly with the increasing demand for high-power data center capacity, positioning us for long-term growth and profitability,” continued Prager.

Patrick Fleury, TeraWulf’s CFO added, “In the second quarter of 2024, TeraWulf delivered solid financial performance, even in a challenging fundamental business environment following the Bitcoin reward halving in April, mining a total of 699 bitcoin across our facilities. During the quarter, we maintained our focus on cost management, achieving quarter-over-quarter reductions in power costs at Lake Mariner and SG&A expenses. In addition, our robust balance sheet, highlighted by a strong cash position and the elimination of debt, positions us well for future growth. We remain committed to maximizing shareholder value as we diversify into HPC and AI expansion in the latter half of the year.”

Production and Operations Update

The recent completion of Building 4 at the Company's wholly owned Lake Mariner Facility in New York has expanded TeraWulf’s bitcoin mining infrastructure capacity to 245 MW and over 10.0 EH/s across its two sites. The Company has also begun construction on Building 5 at the Lake Mariner Facility, which is expected to contribute an additional 50 MW of

infrastructure capacity by Q1 2025. This capacity can be utilized for bitcoin mining or AI/HPC compute applications.

In Pennsylvania, the Company currently has 50 MW of operational mining capacity at the Nautilus Cryptomine Facility, a joint venture with Cumulus Coin, LLC. TeraWulf's additional 50 MW of expansion capacity at the Nautilus Cryptomine Facility is planned to come online in 2025, potentially increasing TeraWulf's bitcoin mining operating capacity by up to 2.5 EH/s at the site.

As previously announced, the Company is advancing activities to support a large-scale, high-performance computing (HPC) and AI project at the Lake Mariner Facility. The Company has committed an initial 2 MW block of power to the project, capable of supporting thousands of the latest generation graphics processing units (GPUs). During the second quarter, the Company purchased a 128-GPU cluster from NVIDIA, financed by a leading OEM. To support this project, the Company has upgraded the internet interconnection at the Lake Mariner Facility to meet the bandwidth requirements of AI, designed a closed-loop liquid cooling system, and ensured power supply redundancy for 100% reliability.

Second Quarter 2024 GAAP Financial Results

Revenue in the second quarter of 2024 increased 130.2% to \$35.6 million as compared to \$15.5 million in the second quarter of 2023. This increase is attributable to a significant growth in operating self-mining hashrate as well as a higher average bitcoin price relative to the second quarter of 2023. Notably, revenue and expenses reported in the TeraWulf GAAP income statement excludes revenue and expenses from the Nautilus joint venture; the net financial impact of the Nautilus joint venture is captured within equity in net income (loss) of investee, net of tax in the consolidated statements of operations.

Gross profit (exclusive of depreciation) in the second quarter of 2024 increased 109.4% to \$21.7 million compared to \$10.3 million in the second quarter of 2023. Gross profit margin as a percentage of revenue decreased to 60.9% in the second quarter of 2024 compared to 66.9% in the second quarter of 2023, primarily due to an approximate doubling in network difficulty and the bitcoin reward halving in April 2024, partially offset by a 105.6% increase in average operating hashrate and 135.9% increase in average value per bitcoin self-mined year-over-year.

During the second quarter of 2024, the Company repaid \$30.2 million of debt, followed by an additional \$75.8 million repayment in July 2024 to fully pay down the remaining balance on the Term Loans ahead of maturity.

About TeraWulf

TeraWulf (Nasdaq: WULF) owns and operates vertically integrated, environmentally clean bitcoin mining facilities in the United States. Led by an experienced group of energy entrepreneurs, the Company currently has two bitcoin mining facilities: the wholly owned Lake Mariner Facility in New York, and Nautilus Cryptomine Facility in Pennsylvania, a joint venture with Cumulus Coin, LLC. TeraWulf generates domestically produced bitcoin powered primarily by nuclear and hydro energy with a goal of utilizing predominantly 100% zero-carbon energy. With a core focus on ESG that ties directly to its business success, TeraWulf expects to offer attractive mining economics at an industrial scale.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, as amended. Such forward-looking statements include statements concerning anticipated future events and expectations that are not historical facts. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements. In addition, forward-looking statements are typically identified by words such as “plan,” “believe,” “goal,” “target,” “aim,” “expect,” “anticipate,” “intend,” “outlook,” “estimate,” “forecast,” “project,” “continue,” “could,” “may,” “might,” “possible,” “potential,” “predict,” “should,” “would” and other similar words and expressions, although the absence of these words or expressions does not mean that a statement is not forward-looking. Forward-looking statements are based on the current expectations and beliefs of TeraWulf’s management and are inherently subject to a number of factors, risks, uncertainties and assumptions and their potential effects. There can be no assurance that future developments will be those that have been anticipated. Actual results may vary materially from those expressed or implied by forward-looking statements based on a number of factors, risks, uncertainties and assumptions, including, among others: (1) conditions in the cryptocurrency mining industry, including fluctuation in the market pricing of bitcoin and other cryptocurrencies, and the economics of cryptocurrency mining, including as to variables or factors affecting the cost, efficiency and profitability of cryptocurrency mining; (2) competition among the various providers of cryptocurrency mining services; (3) changes in applicable laws, regulations and/or permits affecting TeraWulf’s operations or the industries in which it operates, including regulation regarding power generation, cryptocurrency usage and/or cryptocurrency mining, and/or regulation regarding safety, health, environmental and other matters, which could require significant expenditures; (4) the ability to implement certain business objectives and to timely and cost-effectively execute integrated projects; (5) failure to obtain adequate financing on a timely basis and/or on acceptable terms with regard to growth strategies or operations; (6) loss of public confidence in bitcoin or other cryptocurrencies and the potential for cryptocurrency market manipulation; (7) adverse geopolitical or economic conditions, including a high inflationary environment; (8) the potential of cybercrime, money-laundering, malware infections and phishing and/or loss and interference as a result of equipment malfunction or break-down, physical disaster, data security breach, computer malfunction or sabotage (and the costs associated with any of the foregoing); (9) the availability, delivery schedule and cost of equipment necessary to maintain and grow the business and operations of TeraWulf, including mining equipment and infrastructure equipment meeting the technical or other specifications required to achieve its growth strategy; (10) employment workforce factors, including the loss of key employees; (11) litigation relating to TeraWulf and/or its business; and (12) other risks and uncertainties detailed from time to time in the Company’s filings with the Securities and Exchange Commission (“SEC”). Potential investors, stockholders and other readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they were made. TeraWulf does not assume any obligation to publicly update any forward-looking statement after it was made, whether as a result of new information, future events or otherwise, except as required by law or regulation. Investors are referred to the full discussion of risks and uncertainties associated with forward-looking statements and the discussion of risk factors contained in the Company’s filings with the SEC, which are available at www.sec.gov.

Non-GAAP Measure

To provide investors with additional information in connection with our results as determined in accordance with generally accepted accounting principles in the United States (“GAAP”), we disclose Adjusted EBITDA as a non-GAAP measure. This measure is not a financial measure calculated in accordance with GAAP, and it should not be considered as a substitute for net income, operating income, or any other measure calculated in accordance with GAAP, and may not be comparable to similarly titled measures reported by other companies.

We define Adjusted EBITDA as income (loss) from continuing operations adjusted for (i) impacts of interest, taxes, depreciation and amortization; (ii) preferred stock dividends, stock-based compensation expense and related party expense to be settled with respect to common stock, all of which are non-cash items that the Company believes are not reflective of its general business performance, and for which the accounting requires management judgment, and the resulting expenses could vary significantly in comparison to other companies; (iii) equity in net income (loss) of investee, net of tax, related to Nautilus; (iv) other income which is related to interest income or income for which management believes is not reflective of the Company’s ongoing operating activities; (v) loss on extinguishment of debt, which is not reflective of the Company’s general business performance; and (vi) loss from discontinued operations, net of tax, which is not applicable to the Company’s future business activities. The Company’s non-GAAP Adjusted EBITDA also includes the impact of distributions from investee received in bitcoin related to a return on the Nautilus investment, which management believes, in conjunction with excluding the impact of equity in net income (loss) of investee, net of tax, is reflective of assets available for the Company’s use in its ongoing operations as a result of its investment in Nautilus.

Management believes that providing this non-GAAP financial measure allows for meaningful comparisons between the Company’s core business operating results and those of other companies, and provides the Company with an important tool for financial and operational decision making and for evaluating its own core business operating results over different periods of time. In addition to management’s internal use of non-GAAP Adjusted EBITDA, management believes that Adjusted EBITDA is also useful to investors and analysts in comparing the Company’s performance across reporting periods on a consistent basis. Management believes the foregoing to be the case even though some of the excluded items involve cash outlays and some of them recur on a regular basis (although management does not believe any of such items are normal operating expenses necessary to generate the Company’s bitcoin related revenues). For example, the Company expects that share-based compensation expense, which is excluded from Adjusted EBITDA, will continue to be

a significant recurring expense over the coming years and is an important part of the compensation provided to certain employees, officers, directors and consultants. Additionally, management does not consider any of the excluded items to be expenses necessary to generate the Company's bitcoin related revenue.

The Company's Adjusted EBITDA measure may not be directly comparable to similar measures provided by other companies in the Company's industry, as other companies in the Company's industry may calculate non-GAAP financial results differently. The Company's Adjusted EBITDA is not a measurement of financial performance under GAAP and should not be considered as an alternative to operating loss or any other measure of performance derived in accordance with GAAP. Although management utilizes internally and presents Adjusted EBITDA, the Company only utilizes that measure supplementally and does not consider it to be a substitute for, or superior to, the information provided by GAAP financial results. Accordingly, Adjusted EBITDA is not meant to be considered in isolation of, and should be read in conjunction with, the information contained in the Company's consolidated financial statements, which have been prepared in accordance with GAAP.

The following table is a reconciliation of the Company's non-GAAP Adjusted EBITDA to its most directly comparable GAAP measure (i.e., net loss attributable to common stockholders) for the periods indicated (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2024	2023	2024	2023
Net loss attributable to common stockholders	\$ (11,168)	\$ (17,805)	\$ (21,067)	\$ (44,321)
Adjustments to reconcile net loss attributable to common stockholders to non-GAAP Adjusted EBITDA:				
Preferred stock dividends	292	265	578	524
Loss from discontinued operations, net of tax	—	3	—	38
Equity in net (income) loss of investee, net of tax	(767)	3,296	(6,042)	13,463
Distributions from investee, related to Nautilus	7,065	4,943	19,087	4,943
Income tax benefit	—	—	—	—
Other income	(447)	(54)	(947)	(54)
Loss on extinguishment of debt	—	—	2,027	—
Interest expense	5,325	8,450	16,370	15,284
Depreciation	14,133	6,428	29,221	11,861
Amortization of right-of-use asset	251	251	503	501
Stock-based compensation expense	4,842	1,734	11,773	2,610
Related party expense to be settled with respect to common stock	—	104	—	417
Non-GAAP Adjusted EBITDA	\$ 19,526	\$ 7,615	\$ 51,503	\$ 5,266

¹ Excludes BTC earned from profit sharing associated with a hosting agreement that expired in February 2024 at the Lake Mariner Facility and includes TeraWulf's net share of BTC produced at the Nautilus Cryptomine Facility.

² The Company's share of the earnings or losses of operating results at the Nautilus Cryptomine Facility is reflected within "Equity in net income (loss) of investee, net of tax" in the consolidated statements of operations. Accordingly, operating results of the Nautilus Cryptomine Facility are not reflected in revenue, cost of revenue or cost of operations lines in TeraWulf's consolidated statements of operations. The Company uses these metrics as indicators of operational progress and effectiveness and believes they are useful to investors for the same purposes and to provide comparisons to peer companies. All figures except Bitcoin Self-Mined are estimates.

³ Excludes BTC earned from profit sharing associated with a hosting agreement that expired in February 2024 at the Lake Mariner Facility and TeraWulf's net share of BTC produced at the Nautilus Cryptomine Facility.

⁴ Computed as the weighted-average opening price of BTC on each respective day the Self-Mined Bitcoin is earned.

⁵ The Q2 2024 and Q2 2023 calculations excludes 0 and 17 bitcoin, respectively, earned via hosting profit share.

⁶ While nameplate inventory for TeraWulf's two facilities is 8.8 EH/s, actual monthly hash rate performance depends on a variety of factors, including (but not limited to) performance tuning to increase efficiency and maximize margin, scheduled outages (scopes to improve reliability or performance), unscheduled outages, curtailment due to participation in various cash generating demand response programs, derate of ASICS due to adverse weather and ASIC maintenance and repair.
