

Physician Portal Registration Guide

1. To register for the Interpace Diagnostics Physician Portal, use the link <https://portal.interpacedx.com/> and click on **Register New Account** to submit your application.
2. There are two types of access to choose from. Choose the access that applies to you and follow the instructions on the screen to complete your registration.
 - a. **Institution Access:** Provides access to a group of delegates for an institution. Authorized Delegates are individuals authorized by the Laboratory Director or Medical Director to access all test reports or test requisitions associated with the submitting institution, such as group practice partners and staff who are permitted to access and use Protected health information (PHI) under federal law (HIPAA).
 - b. **Physician Access:** Provides limited access to one physician's patient results only.

3. Once your registration has been completed, the form will be sent to the Authorizing Provider/Representative for review and signature via a DocuSign eSignature program within 24 business hours of receipt.
4. Upon receiving the authorizing signature, you will receive an e-mail from the Interpace Diagnostics Portal System with further instructions for logging into your new account. If you do not receive your activation e-mail within 48 business hours of submission, please check your spam/junk folder.
