Our Priorities

OUR VISION

To achieve sustainable profitable growth through the purchase, installation and distribution of insulation and other building products throughout the United States.

OUR MISSION

To lead our sector while driving operational efficiency and excellence, exceeding customer expectations, operating according to our values, and promoting safety above all.

OUR CORE VALUES

SAFETY

We put the *safety* of our *people* first.

INTEGRITY

We deliver results with *integrity*, *respect*, and *accountability*.

FOCUS

We are *customer-focused*, grounded in strong relationships.

INNOVATION

We are *continuously improving* and encourage idea sharing.

UNITY

We are united as one *team*, valuing *diversity*.

COMMUNITY

We *make a difference* in the communities we serve.

EMPOWERMENT

We are *empowered* to be our best, individually and as a team.

OUR LEADERSHIP PRINCIPLES

To improve the communities that we serve, modeling the behaviors we expect from our supplier partners and embracing our role as custodians of our planet.

A Message from our CEO

I am pleased to present our third annual Corporate Sustainability Report highlighting our recent environmental, social and governance (ESG) progress. As a leading installer and distributor of insulation and building products to the U.S. construction industry, we understand we have a responsibility to lead by example and to positively impact the environment and the communities where we live, work and serve.

Our core values serve as our guiding principles in growing and managing our business. This means:

- A strong commitment to safety at work and at home
- Developing leadership and a workforce that integrates diversity and is inclusive
- Establishing strong corporate governance policies
- Promoting energy efficiency in new building construction
- Making a difference in our communities
- Encouraging our employees to live a healthy lifestyle

For example, when COVID-19 became a pandemic in early 2020, our cornerstone value of Safety served as the guide for our path forward. We created a Field Operations support team to implement specific measures to safeguard our employees' health and wellbeing and, where appropriate, instituted a work-from-home policy at certain operating facilities.

This past year we also reexamined our core value of Unity and what it means to our Company and our co-workers. We have defined Unity to mean that "we are united as one team, valuing diversity." To value diversity means that we treat every individual – regardless of race, ethnicity, gender, sexual orientation, religion, age, physical ability, or other differences – as a valued person. Our goal for TopBuild is that we live our value of Unity and work together as one team, respecting those things that make us different while recognizing that these are the same things that make us better.

In this sustainability report you will learn more about our core values, our initiatives in the areas of environmental sustainability, corporate governance and human capital and what they mean for our 10,000+ employees across the United States.

We have expanded our Workplace Safety section to include metrics surrounding workplace incident rates among our employees and we are making available for stakeholders several existing policies including those concerning:

- Human Rights
- Equal Opportunities for Employees
- Harassment-Free Workplace
- Drug-Free Workplace
- Workplace Violence

Looking ahead, you can be assured we will continue our mission to create value for our stakeholders by improving our efficiency and moving the goal forward on our ESG performance. We look forward to continued progress in 2020 and beyond.

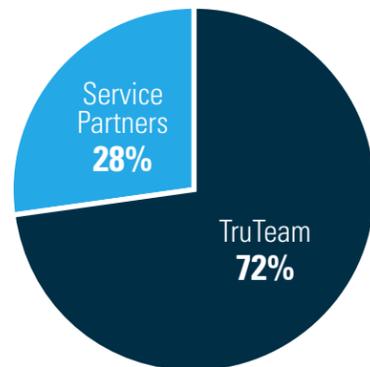

Robert Buck
President and Chief Executive Officer
February 2021

Our Business

TopBuild Corp., a Fortune 1000 Company headquartered in Daytona Beach, Florida, is a leading installer and distributor of insulation and building material products to the U.S. construction industry. We provide insulation and building material installation services nationwide through TruTeam®, which has close to 200 branches, and through Service Partners®, which distributes insulation and building material products from approximately 75 branches. We leverage our national footprint to gain economies of scale while capitalizing on our local market presence to forge strong relationships with our customers. To learn more about TopBuild please visit our website at www.topbuild.com.

Stakeholder Engagement

We listen to our stakeholders to understand their priorities and determine how we best can respond to their needs while supporting our investment strategy.

Key investors provide input throughout the year. We communicate regularly with our customers and suppliers through phone calls and in-person meetings and engage our coworkers through a variety of programs, training and volunteer activities.

02 Environmental

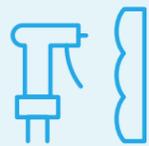

Stewardship

TopBuild is committed to operating in a manner which conserves our natural resources for future generations and adheres to environmental laws and regulations. In 2019, we created and staffed an EPA Compliance Department to establish a strong foundation for the future. This group is responsible for oversight of environmental issues that may impact both field operations and corporate locations (e.g., compliance with Federal (EPA) and state environmental program requirements, including air, water, wastewater, storm water, solid and hazardous waste, EPCRA). The group has also established partnerships with leading environmental services companies leading to metrics driven waste management strategies and increased oversight of our waste generation. Our focus remains on better quantifying environmental metrics to create actionable initiatives to reduce fuel consumption, minimize waste and combat climate change.

As a leader in insulation across the United States, we offer innovative solutions which align with our commitment to protecting our environment. Our product offerings continue to evolve, and we are steadfast in our devotion to provide environmentally conscious products, including natural fiber insulation and low global warming potential (GWP) foams. Please visit our website at www.topbuild.com to learn more about our environmentally friendly product offerings.

TopBuild Home Services

A long-standing, proven commitment to energy-efficient design and building science.

Building energy codes set minimum efficiency boundaries that provide tangible benefits such as reduced energy consumption, increased cost savings and reduced CO2 emissions. These requirements affect the building envelope, doors, windows, HVAC systems, lighting and water heating systems. Building energy codes will save U.S. home and business owners 841 million metric tons of avoided carbon dioxide emissions through 2040.¹

TopBuild Home Services deploys a national team of local energy code and energy testing compliance experts. Upon state adoption of a new energy code, we conduct code compliance training internally and with builders to ensure they are meeting the new energy code regulations.

We are also innovative leaders in building science, offering a number of services and tools designed to help builders apply building science principles to new home construction. These programs help builders construct more energy-efficient, comfortable, and durable homes, compared to conventional code-built homes.

Workplace Safety

At TopBuild, the safety of our more than 10,000 employees comes first. With over 15,000+ job sites visited each day, safety is not just a choice – it’s engrained in our culture and our code of ethics. Whether it’s driving a truck to a jobsite, erecting scaffolding or using a ladder to hang gutters, our 275 divisions strive to maintain a Zero-Accident Safety Culture.

TopBuild employees are responsible for their own safety and also for the safety of those around them. If unsafe behavior is observed, we expect our employees to stop work, have a respectful conversation about the issue at hand and report the unsafe behavior to their supervisors, as appropriate.

All of our professional installers wear personal protective equipment (PPE) that meets or exceeds OSHA standard guidelines. Additionally, we conduct regular safety meetings and up-to-date safety training for our all of our employees.

INCIDENT RATE*

Our Incident Rate has steadily declined since 2017 and we believe this downward trend is an important indicator of the effectiveness of our safety programs over time.

*Total number of work-related injuries per 100 full-time employees

Safety Training for Newly Hired Installers

01

Within 48 hours from the date of hire or before employees are exposed to potential hazards, all installers must complete training to demonstrate competency in these skills:

- Use of Personal Protective Equipment
- Ladder Safety
- Scaffolding Safety
- Fall Protection
- Incident Reporting

02

After completing this training, additional training must be completed within 60 days of the hire date or before employees are exposed to additional potential hazards:

- Respiratory Protection Policy
- Commercial and Non-Commercial Driver Training/DOT Safety
- Vehicle Safety
- Fire Prevention Policy
- Procedures for OSHA Visits
- Slips, Trips and Falls
- Stilt Training
- Chemical Safety

Regional Safety Managers will randomly audit new hire safety training records and Job Site Inspections documents (JSIs) both during on-site visits and remotely, to ensure quality training and inspections are completed within the required timeframe. TopBuild adheres to strict employee and leadership accountability in the application of safety policies and procedures.

Our Fleet

TopBuild currently operates a fleet of 5,000+ vehicles that range from passenger vehicles to semi-tractor trailers. Through rigorous enforcement of Federal Motor Carrier Safety Administration (FMCSA) & Department of Transportation (DOT) regulations, we monitor the operational efficiency of our fleet in a manner that promotes the safety of our workforce and our communities while reducing the carbon footprint of our vehicles.

We have also installed GPS tracking systems on much of our fleet that weave safety into our drivers' daily operations to track, analyze, and report in real time. Safety data, such as speeding, hard braking, and sudden acceleration, enables us to see where improvement is needed and monitor progress.

Employee Safety Pledge

It is the intent of TopBuild to provide a safe and healthy working environment for all employees. I recognize that this can only be met with my full cooperation.

I understand that safety starts with me, that safety is a lifestyle, not a program or initiative. I agree that safe behaviors need to be a part of everyday life. I understand that safety is everywhere -- at the office, on every project, every day. I recognize that unsafe actions on my part may result in injuries to me and others.

I know that the timely completion of jobs is important to the company. However, at TopBuild the safety of the employee is priority.

As a TopBuild employee, I will never sacrifice or compromise safety to perform a job more quickly or easily. I will recognize, acknowledge, and encourage safe work habits and behavior that support TopBuild's safety Vision and Values.

To illustrate that safety is my priority, I pledge to do the following:

- Work safely as a condition of employment and accept responsibility for my own safety.
- Always put safety first in completing my duties.
- Inspect my equipment prior to start of work, report any unsafe conditions immediately, and never operate unsafe equipment.
- Inspect each jobsite for hazards prior to starting work, and never work on a site if I cannot do so safely.
- When fall protection (personal fall arrest system or guardrails) is required, I will wear/use it at all times.
- Never expose a body part to moving equipment unless this exception is specifically stated in a written policy or operating procedure and I have received training on the safe method of performing the task.
- Comply with company safety policies and programs.
- **Participate in safety trainings and implement best safety practices provided at the trainings.**
- Know the hazards associated with each job and perform and practice all safety rules.
- Correct all workplace hazards when possible, or report them immediately when they cannot be corrected.
- Report all workplace accidents, injuries, incidents, and near misses immediately to my supervisor, whether or not medical attention is needed.
- Whenever I see a co-worker doing something unsafe, it's my priority to assist them in finding a safer way to do the job.
- Take responsibility to help every co-worker return home safely at the conclusion of every shift.
- Insist on a total commitment to safety excellence from myself and co-workers.
- Do my best to work in a manner consistent with the quality, productivity, and safety of every task that I am assigned.

By signing below, I am committing myself to live up to this pledge and to return home safely every day. I recognize that safety is NOT a program; it is a way of life.

Employee Name: _____ ID Number: _____ Division #: _____

Employee Signature: _____ Date: _____

"Work Safety is my promise to TopBuild, my co-workers and my family."

TopBuild is not only concerned about safety in the workplace, but encourages employees to take these same principles and apply them to their personal lives.

Family...they are why we work. More importantly...why we live and work safely!

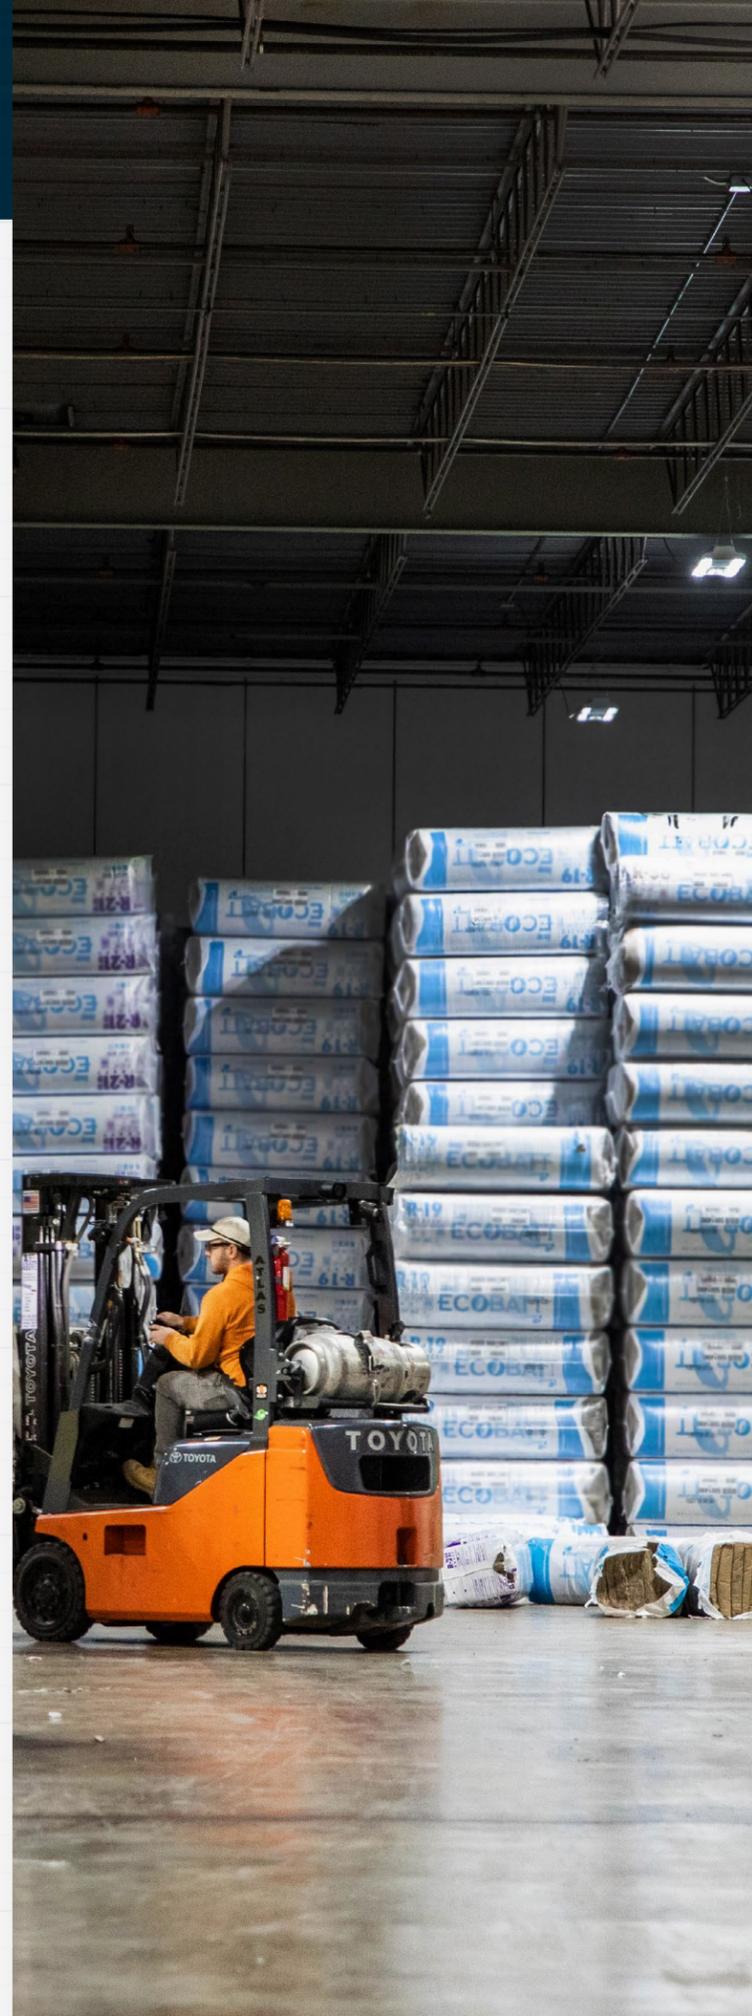

Supplier Code of Conduct

We pride ourselves on our reputation for honesty, integrity, and excellence in everything that we do. We therefore expect and require that all goods produced on our behalf or on behalf of any of the brands in the TopBuild family be made in facilities that meet specific criteria for human rights, working conditions and protection of the environment.

Our selection and continued use of our suppliers is based on the following standards with respect to all goods that we purchase:

- 01 Comply with all applicable laws and regulations.
- 02 Protect against the use of workers younger than the minimum age required by law.
- 03 Protect against the use of forced labor. (Including slavery and human trafficking)
- 04 Provide appropriate wages and benefits as required by law.
- 05 Protect against excessive working hours that exceed local laws or business customs.
- 06 Protect against physical and mental punishment of workers.
- 07 Protect against unlawful discrimination against workers and encourage employment based on ability.
- 08 Respect workers' rights to associate freely.
- 09 Maintain safe and clean workplaces, including any residential facilities, in compliance with the law.
- 10 Protect our confidential and proprietary information.
- 11 Provide us all requested information regarding Conflict Minerals.

In accordance with the SEC's Conflict Minerals Rule, we have processes to identify whether tin, tantalum, tungsten and gold ("Conflict Minerals") are contained in our products, and, if so, whether the Conflict Minerals may originate from sources that directly or indirectly finance or benefit armed groups operating in the Democratic Republic of the Congo and surrounding countries. We expect our suppliers to source Conflict Minerals from suppliers who meet our Supplier Business Practices Policy requirements, to ensure worker safety and fairness, to embrace environmental responsibility, to implement traceability measures for Conflict Minerals and to provide us with all requested information, including information about all suppliers in their supply chains, so that we can comply with the SEC's Conflict Minerals Rule.

We will not knowingly work with suppliers that do not respect these standards and those of our customers. Suppliers are expected to use this method as well as observing and cooperating with industry initiatives designed to eliminate the use of conflict minerals. We will periodically assess our suppliers' compliance with these standards and those of our customers. Any reported non-compliance will be investigated and appropriate action will be taken. These standards apply whether the supplier is a TopBuild company, an affiliate, or a third party.

03 Social

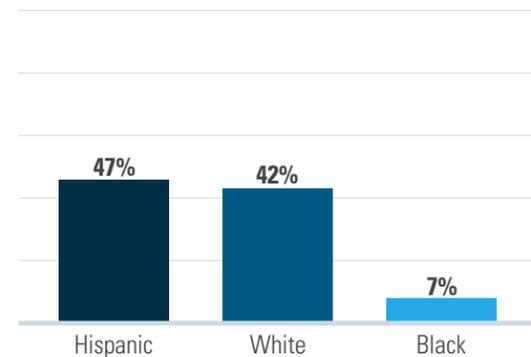

Human Capital

Our people are the foundation of our success. We strive to foster a culture of inclusivity, collaboration, support and innovation where every voice is welcome, heard and respected.

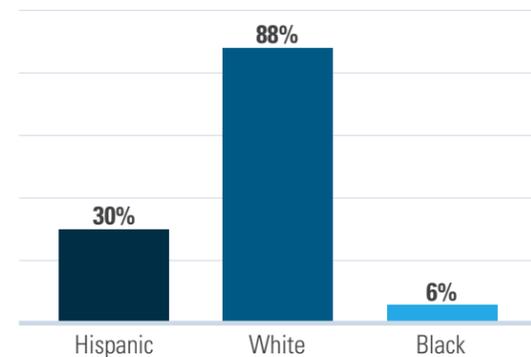

Our goal is to ensure our workforce reflects the diversity of the communities in which we operate. Towards that end, we have implemented a comprehensive Affirmative Action Plan to ensure we are targeting all candidate groups during the recruitment process and providing equal opportunities for all our coworkers. To ensure equal pay, we have implemented salary banding that defines a salary range for each role based on market and internal value. Additionally, we facilitate biennial companywide non-harassment trainings and provide frequent training to managers on our Affirmative Action Plan, discrimination and unconscious bias in the workplace, and fair hiring and employment practices.

We are committed to a work environment in which all individuals are treated with respect and dignity. Each individual has the right to work in a professional atmosphere that promotes equal employment opportunities and prohibits unlawful discriminatory practices, including harassment. We expect that all relationships among persons in the office will be business-like and free of explicit bias, prejudice and harassment. We have developed this policy to ensure that all of our employees can work in an environment free from unlawful harassment, discrimination and retaliation.

WE ACTIVELY SOLICIT EMPLOYEE FEEDBACK Voice of the Employee Survey

TopBuild employees exceeded the national distribution benchmark in the areas of:

- Highly engaged and committed to TopBuild, strong sense of accomplishment from their work
- Open, transparent communication within corporate, as a driver of engagement

Focus areas include:

- Employee empowerment
- Aligning and equipping managers with recognition, support and feedback tools for them to use with their teams

64%
of employees responded
to the survey

Responding to COVID-19

In early March, when COVID-19 became a pandemic in the U.S., our cornerstone value of Safety served as the guide for our path forward. Protecting the health of our employees was our number one priority. A cross-functional team was established to develop and implement strict safety protocols across our company, and internal communications were ramped up to ensure our 10,000 plus employees knew and understood the actions we were taking. Our team looked to guidelines from the Centers for Disease Control (“CDC”) to establish appropriate policies and procedures and continues to proactively monitor official guidelines.

As our services were deemed essential in all but four states, our team focused on keeping our employees safe in our branches and on job sites. This included:

Requiring employees to wear face coverings at all times

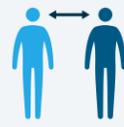

Prohibiting large gatherings and limiting in-person visits from third parties

Installing solid, plexiglass barriers between work stations

Cleaning and sanitizing our facilities and vehicles daily

Practicing social distancing on job sites

At our Branch Office Support Center in Daytona Beach, we instituted a work from home policy to limit the number of individuals at this facility.

We also recognized that it was inevitable that some of our employees would be directly impacted by COVID-19. We therefore established a Leave Plan for team members that provides financial assistance for a period of time if they are unable to work due to COVID-19 related situations.

The global pandemic has served to reinforce the high priority we have always placed on the health and well-being of our employees and their families. We will continue to monitor the situation and adhere to best practices in protecting our team.

Diversity

TopBuild is an equal opportunity employer that does not discriminate against any employee or job applicant because of race, color, religion, national origin, sexual orientation and identity, physical or mental disability or age.

We have implemented a comprehensive Affirmative Action Plan to ensure we are targeting all candidate groups during the recruitment process and providing equal opportunities for all our coworkers.

To ensure equal pay, we have implemented salary banding that defines a salary range for each role based on market and internal value.

Additionally, we facilitate biennial companywide non-harassment trainings and provide frequent training to managers on our Affirmative Action Plan, discrimination and unconscious bias in the workplace and fair hiring and employment practices.

Whistleblower Policy

TopBuild expects its employees to carry out their duties and responsibilities in an ethical manner and in compliance with applicable laws and regulations at all times where TopBuild carries on business.

We maintain a Whistleblower/Ethics hotline and provide an email address to allow the anonymous disclosure of any illegal issues, safety violations or unethical conduct.

Reported matters are investigated by the appropriate corporate function or escalated to the Board, as required by the Compliance Reporting Policy. Investigations are closed in a timely manner and results reported to the Board on a quarterly basis.

Crime and Security

TopBuild closely tracks reported crimes, sharing information with management in a quarterly report as well as on an immediate basis, if warranted.

The vast majority of crimes are associated with theft of fuel and materials. TopBuild takes all such allegations seriously and coordinates with law enforcement authorities, where appropriate.

TopBuild issues a quarterly security awareness letter to all managers to share with their teams. Content emphasizes “see something, say something” and includes identity theft mitigation, cybersecurity awareness and internal policies related to security awareness. Additional training is conducted on a consistent basis to mitigate theft as much as possible.

SEE
something
SAY
something

M&A Due Diligence

Our business development team has created a comprehensive due diligence checklist when considering new acquisitions that includes identifying various environmental, social and governance factors.

When conducting due diligence, we ask questions such as:

01

What processes are in place to monitor and control the supply chain/inventory?

02

Have you had significant issues with theft?

03

How do you dispose of hazardous materials?

04

How many OSHA inspections have you had over the past 12 months and what were the results?

05

How do you handle gutter and other metal scrap?

06

Do you have flexible work hours and/or remote work stations?

Community Engagement

Respect for our communities and for each other is a TopBuild core value and we are committed to making a positive impact on the hundreds of communities where we have a presence. Guided by our strong values and a spirit of service, we have established long-term partnerships with Habitat for Humanity and The Salvation Army, giving back to our neighbors through philanthropy and volunteer opportunities for our employees. In addition to these long-term partnerships, we work with numerous charitable groups across the country to provide assistance when needed, such as during a major disaster or weather event. Our employees also have the opportunity to submit applications for charitable causes or events that are meaningful to them.

Charitable organizations supported by TopBuild must be U.S.-based, recognized as a tax exempt organization under the U.S. Internal Revenue Code, and the charitable organization must submit a statement of purpose and proof of its tax deductible status.

Employee Health and Wellness

The health and physical well-being of our 10,000+ full-time employees is a high priority for TopBuild and we are focused on helping them make smart and healthy choices that can improve their quality of life.

In addition to offering comprehensive healthcare plans for employees and their families, we also provide:

BIOMETRIC SCREENINGS

- BMI
- Height & weight
- Blood pressure
- Cholesterol

SUBSIDIZED FITNESS CENTER MEMBERSHIPS

STOP SMOKING PROGRAMS

AT-WORK WEIGHT LOSS PROGRAMS

Overview

TopBuild is led by Robert Buck, President, Chief Executive Officer and Director.

The Company is governed by a Board of Directors that includes six directors who meet the independence requirements of the New York Stock Exchange.

TopBuild is committed to corporate governance practices that promote honesty, accountability, transparency, integrity and an ethical work environment. We are guided by corporate governance guidelines and a Code of Business Conduct and Ethics applicable to all directors, officers and employees. Our Board believes that setting the tone at the top with a strong governance structure is critical to our long-term success.

As a condition of employment, we require all employees to review and comply with the code and complete an annual conflict of interest questionnaire. To ensure greater transparency and preserve the trust of our stakeholders, our corporate governance guidelines and code are disclosed in the “Governance” section of our website.

Program Highlights

Board Leadership

- All board members are elected annually by shareholders
- Six of our seven board members are independent
- Two female members
- Position of Chairman and CEO are separate
- Strong code of business ethics

Director and Officer Compensation

- Annual incentive bonuses for employees tied directly to performance and capped at varying percentages of base salary, limiting excessive awards for short-term performance
- Limited perquisites
- Stock ownership requirements for officers and directors
- All stock-based plans approved by shareholders
- No hedging or pledging allowed
- Incentive plan claw-backs

Board Committees

- Audit, Compensation and Governance Committees are comprised entirely of independent directors
- The Audit Committee meets with independent and internal auditors regularly
- The Compensation Committee regularly engages an independent compensation consultant
- Our Independent directors regularly meet in private sessions without management present

Risk Management Oversight

- Full board, as well as separate committees, conduct oversight of risk management through regular reviews

Enterprise Risk Management

While our management is responsible for the day-to-day management of risks to the Company, our Board has broad oversight responsibility for our risk management programs directly and through various Board committees. Our Board regularly reviews information regarding the Company's credit, liquidity and operations, including the risks associated with each.

COMPENSATION

The Compensation Committee is responsible for overseeing the management of risks relating to the Company's compensation policies and practices.

AUDIT

The Audit Committee is responsible for the oversight of financial risks, including the steps the Company has taken to monitor and mitigate these risks. Additionally, the Audit Committee is responsible for oversight risks related to the Code of Business Ethics with respect to executive officers and senior financial officers.

GOVERNANCE

The Governance Committee is responsible for the oversight of risks related to corporate governance and, in its role of reviewing and maintaining the Company's Corporate Governance Guidelines and Code of Business Ethics, manages risks associated with the independence of the Board and potential conflicts of interest.

ESG Oversight

To ensure that our organization goals and our environmental, social and governance (ESG) practices are well aligned, we have created a cross-functional ESG Committee that reports semi-annually to our Board of Directors. This Committee monitors climate-related issues and the potential impact thereof on our business.

Our Board of Directors considers climate-related issues when reviewing our Long-Term Strategic Plan, risk management policies, annual budgets, potential acquisition targets and the investment of capital.

With the full support of our Senior Leadership team and our Board of Directors, the ESG Committee promotes sustainability practices across our organization and closely monitors our performance within the areas of environmental, social and governance. The Committee falls under the auspices of the Disclosure Committee which is chaired by our Chief Financial Officer.
